

The price breakdown on the Party Area is as follows:

1. Walk Way	50x7	\$	1,361.00
2. Party Concrete Pad	20x40	\$	3,111.11
3. Concrete Drive Way	172x20	\$	17,200.00
4. Fencing and Gates		\$	9,920.00
5. 2 Shade Structures	16.5x16.5	\$	18,000.00
6. Miscellaneous (tables, locks, etc...)		\$	2,000.00
Total		\$	51,592.11

On the drive way we could do the gravel drive way to save money. The shade structure price did go up and we should have a quote by 5:00pm. The price that I gave you would be on the high end. I used the formula that you gave me which was Lenth x Width divided by 9 x Cost. The cost of \$35.00 and \$45.00.

Last year the Recreation Center had 350 pool parties. By adding this new party area it would allow us to have more parties. Pool parties would also be closer to the pool. Kids would not be running back and forth through the hallways drenched. Which causes the floor to become slippery and possible accidents to occur. Also by adding this area we feel it would allow the Recreation Center to offer Fitness Programs and more Recreational programs that would require an open space such as the Party Area.
