Salt Water Chlorinating with Co2 pH control

Resilience Natural Chlorine Generator

- NSF certified to chlorinate commercial pools
- Chlorination Salt Range 3200 ppm (optimal) all the way down to 500 ppm
- Operating temperature down to 33 degrees Fahrenheit
- Produces 2 lbs of 100% pure chlorine per unit per day
- Easy cleaning and maintenance

Co2 pH Control

- When injected in to water produces carbonic acid. Carbonic acid is a natural pH buffer in water.
- Simple to install
- No etching or corroding equipment
- No spills

Web Based Controller

- Web Based portal with Satellite Technology
- Control and monitor your pools chemistry from any internet connection in the world
- Dispense Co2 and produce Chlorine with exact measure from probing the water's chemistry
- Alarmed via email or text message if ORP or pH goes out of preset ranges
