Needs Assessment Survey

Summary Statement:

The Angleton Parks and Recreation Department is in the process of obtaining National Accreditation through the National Parks and Recreation Department. The accreditation process is a two year program that is nearing completion in our City. A crucial part of this process is to reflect our response to community needs. A needs assessment, of sorts, was conducted prior to the building of the Recreation Center. We would like to redistribute an assessment to see what needs have been addressed thus far. We hope to see that our community is enjoying our programming and allowing us an opportunity to grow. Staff is requesting any additional recommendations that you may have for this assessment.

Recommendation:

Please review needs assessment survey
