TXMAS Quote from Marathon Fitness

Executive Summary:

The Recreation Center has expanded its fitness programming. This has led to the problem of concurrent classes occurring. The weight sets we have are unable to accommodate this growth and we would like to purchase an additional set to continue the number of classes offered. In addition to the weights we would like to replace a preacher curl bench that is in poor condition. The final price on the SeaKlear system you approved last month came in about \$1,500 under budget, and we would like to use that difference to purchase this equipment now.

Recommendation:
Approve purchase of equipment.
