

**BUSINESS FOR THE CITY COUNCIL
OF THE
CITY OF ANGLETON**

SUBJECT: Discussion and possible action on

Construction
Modifications to Wastewater Treatment Plant # 1
Level Clarifier Weirs (2) and related RAS Discharge Modification

SUBMITTED BY: Herbert S. Smith, P.E.

DATE SUBMITTED: 19 November 2007 FOR THE AGENDA OF: 27 November
2007

Expenditure Required: \$30,000 (\$25,000 construction, \$4,000 engineering, \$4,000
inspection and engineering supervision of construction)

Available Funding: \$30,000

Attachments: None

SUMMARY STATEMENT:

The City must complete Item 9 of the Lockwood Andrews recommended rehabilitation program (Level Clarifier Weirs), which also requires the completion of Item 3 (Clarifier # 3 RAS Discharge Modification - needed to put Clarifier # 3 into full service during the leveling operation) – by February 2008. This deadline precludes the standard design/bid/build process.

If approved, we will obtain quotes from M & M Construction, and if possible JTM Construction and Uticon.

The estimate in the Lockwood report has been increased 30% to reflect the lack of bid pressure and the separation of these items from a much larger project.

Construction, design and inspection have previously approved by Council as a part of the overall Wastewater Treatment Plant # 1 Improvement Project.

Recommendation: Approve the expenditure.
