SUMMARY STATEMENT:

On October 11 the Electrical Board heard a request for variance to leave wiring in residential home that is being converted to commercial use at 529 E. Mulberry.

=====
Recommendation: The minutes of the Board meeting indicated the following: The Board wanted to grant it, but felt this would set a precedent for others. The Board suggested they appeal to Council. This property was completely re-wired 4-5 years ago and the Board felt it was sufficient although didn't comply with commercial standards.
