

March 2008 Parks Crew Work

Weekly mowing of all complexes, City Hall, Recreation Center and the Police Department.

Mowing of Loop274, Jamison Surgical Center, Carbtex Realty Easement by Gulf Coast Auto Center and all other finish mowing throughout the City.

The Bates Park Brick Monument has been knocked down for a 2nd time. This time we made the frame out of steel square tubing, moved it inside the park and plan to brick around the square tubing at a later date.

Did Park Inspections for all Parks.

Trimmed a lot of brush around the trees in Dickey. South of the butterfly garden. A lot of children cross from there to school and back to waiting parents. By trimming this we have made it easier for traffic to notice children and use caution when driving. Trimming is not yet complete at this time.

Helped install outside cameras at City Hall. Used the bucket truck to mount these cameras.

Built back bar cabinet for new printer folder machine located at City Hall and laid down a Formica top.
