**SUMMARY STATEMENT:**

We understand from the Consulting Engineers' Council that Congress is considering a fiscal stimulus package that would involve investment in public infrastructure improvements nation wide. We also understand that at least the first round of projects must be ready for bidding immediately to be eligible for funding in the first round, anticipated for the President's signature on 20 or 21 January, 2009.

We would like to present to you three projects (two in the budget and one off budget) that could be ready for bidding by early February and therefore eligible for funding under the "ready for immediate construction" criteria:

Miller Street Roadway (not budgeted)

WWTP 2 Pumping Station and Force Main to WWTP 1 (budgeted)

Shanks Roadway, Phase 1 (budgeted; needs right of way)

Obviously, Henderson Road would also be appropriate; however, the project would require a large up front investment and could not be ready in FY 2009.
