

May/June 2008 KAB Council Report

Current Topics and Projects:

*TXDOT came to film for GCAA presentation.

*Currently am working with Mr. Smith on specs for an HGAC recycling grant. Changed from school recycling to expand curbside equipment and education. Cost for school recycling was high and support was low.

*We are still coordinating an effort with other area KTB affiliates to make the Fair a "Green Event". This is sponsored by Dow's KTB green grants. We were selected to head this because we threw out the idea of using the Fair as our venue. There has not been a commitment from the Fair yet. They are concerned it will cost extra in their garbage pickup. Mr. Smith is suppose to get back to me with the cost of pulling and replacing an additional bag (in recycle bins) when crews stop to pull and replace garbage bags. I am unsure if he will figure in that trash will have to be emptied less.

*At the KTB conference we will be part of a round table discussion of winning cities, have a display to exhibit our program, meet with TXDOT on planting rules and be awarded another plaque for the front of City Hall.
