Subject: Request for Variance

Hi Amanda;

I am requesting a Variance for this Project, located at 2901 N. Velasco, in Angleton. I applied for the Permit to take down the Existing Sign and Install the new one, 08/02/07. Irene Reviewed the Project File with the Inspector on 08/12/07, and called me back a couple days later, after he had made his decision. At that time, I notified our Sales Person, so he could contact the customer, to see how they wanted to proceed.

The Sales Person just informed me that we need to proceed with the Request for Variance, since the Customer had already ordered the Signs to be made and delivered, before she contacted us, initially. Now, she has paid for the signs and they have been delivered to us. We received them several months ago, and the customer cannot get a refund on the signs, so she will lose a large sum of money, if we cannot get a Variance for their Installation.

Please consider this Request for a Variance, as a very "Critical" Situation for our Customer, who only purchased the Signs, to help increase business, which only increases Revenue for the City of Angleton. It is unfortunate that the new signs are larger than the City Sign Code recommends; however, she did not intend to create this situation, but is a "Victim of Circumstance".

Please consider this request and advise us on how to proceed.

Thank you very much for your assistance with this matter.

Subject: RE: Request for Variance

Good Morning Amanda;
The Size of the Existing Sign is 128 Square Feet.
The Proposed New Sign will be 144 Square Feet
We appreciate anything you can do to help us, since our Client stands to lose a great deal of money, if she can't use these signs.

Please advise.
Thank you very much for your help with this Project.
