

Explanation of the denials of CVS signage

1. Section 7 (C) 1, 1.2(a) allows an individual business to have one monument sign for their business. They are asking for three monument signs.
2. Section 7(C) 1, 1.1 allows wall signage square footage at the ratio of 1.5 sq. ft. of signage for every linear foot of business frontage. Business frontage is defined as the linear measurement of the side of the building which contains the primary entrance of the building. This would allow for 135 sq. ft. of wall signage if the front elevation is considered front of building. They would be allowed 205 sq. ft. of signage if the right elevation is considered the front of the building. Their total wall signage request proposed is 513 sq. ft. of wall signage.
3. The proposed directional signs are considered free standing signs because they have the CVS /Pharmacy name on them, thus they are not considered traffic signs. They already have the one large free standing sign in parking lot. If they were directional monument signs, they would exceed the 2 sq. ft allowed by the sign ordinance, Section 14 (F).
