New bid from Nalcom

**Summary Statement:**

As you recall we had issues with the remote access of the MIP 5000 from Motorola. We determined Motorola's bid did not meet our specifications and I have notified them of this. They will not be charging us for the MIP 5000. The second company that bid this project was Nalcom. The current bid is attached; it is a little bit higher now (120 day later prices have increased). We have seen the Nalcom system work in Angleton and they to have guaranteed that the system will do what is expected.

**Recommendation:**

Ratify the purchase of Emergency Management Radio Equipment.
