02/16/2009

To: City of Angleton

Att: Greg Smith

City Administrator

The Angleton Fire Fighters Association was recently informed that they are receiving a grant from the Texas Forestry Service the sum of \$155,000.00 to go toward the purchase of a new Tanker Truck. If we go with the option of (CAFS) Compressed Air Foam System the State Forestry will upgrade the grant to \$173,000.00. The proposal is for the City of Angleton cover the difference of the cost so that the Angleton Fire Fighters Association may purchase a new Custom Cab Class A 1250GPM Pumper with CAFS unit. This would greatly enhance the city's ISO rating and fire protection. As well as to help upgrade and ageing fleet of fire apparatus.

Option 1 Texas Forestry Grant w/o CAFS \$155,000.00

<u>Pumper without CAFS</u>	\$319,995.00
----------------------------	--------------

City of Angleton	\$164,995.00
------------------	--------------

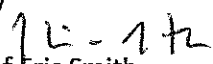

Option 2 Texas Forestry Grant w/CAFS \$173,000.00

<u>Pumper with CAFS</u>	\$340,000.00
-------------------------	--------------

City of Angleton	\$167,000.00
------------------	--------------

Please let us know if this is a workable solution.

Sincerely

Fire Chief Eric Smith
