Ordinance No. 2009-O-6C.

Summary Statement:

This Ordinance amends Chapter 5 of the Angleton City Code “Buildings and Building Regulations” to require the securing of construction debris on all job sites during normal construction activities and during weather emergencies which generate high winds such as tropical storms and hurricanes. The purpose of the Ordinance is to prevent high winds from blowing roof tiles and other construction debris from job sites and creating safety hazards. This Ordinance is timely since this year’s hurricane season officially began on June 1, 2009.

Recommendation:

Staff recommends approval of this Ordinance.
