Roadway Lighting Rehabilitation on SR-20(US-31)
From Market Street to North of Riverwalk Marina
Decatur, Alabama
Supplemental #1rev1**

Dear Mr. Prewitt:

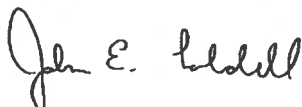

As discussed with your office late last week, we are requesting a supplemental due to unforeseen circumstances on the subject project. The additional fee is due to the following:

1. Due to issues with the construction funding, the project had to be let to construction twice last year. This caused additional effort and costs from our office.
2. The contractor has submitted Change Order #1 which includes repair to the existing foundations on eleven light poles which have deteriorated over time and requested an additional 16 days of contract time to complete this task. We anticipate approval of the Change Order and believe the time extension requested is appropriate.

A breakdown of the time requested is shown "Attachment A" and includes manpower needed to complete this project.

As always, if you have any questions or concerns, please let us know. Thanks

Respectfully Submitted,

John E. Lobdell, P.E.

RE: Fee Proposal for Carbon Reduction Grant – Detection Systems for Traffic Signals

Project No. (to be determined)

Various Intersections throughout the City of Hartselle

Dear Mr. Wood:

After coordinating with you via phone calls and emails about the Carbon Reduction Grant that the city will be applying for, we are providing this Fee Proposal for the Preliminary Engineering and Construction Engineering & Inspection for the proposed project.

It is understood that the intent of the project is to improve eight (8) signalized intersections within the city with panoramic video detection systems. Preparing engineering design and construction drawings for these intersections will be required as well as construction engineering and inspection during the project to ensure compliance with specifications, drawings, and standards. The construction of the project will be performed by contractors and suppliers from an approved state list for this type of work. The city shall coordinate that effort with local agencies and the engineer of record (PWM) for any selection process or bidding that may be required.

Initial opinions of the probable cost performed by others indicate that the construction cost of this project is expected to be in the range of \$140,000 to \$150,000.

Estimated Scope of Work and Proposed Fee:

Surveying and Engineering Design (Preliminary Engineering) = \$22,500:

- Construction drawings are limited to the areas shown within the hatched designated areas on the attached sheets of the proposed eight (8) intersections and shall not include designs for roadway improvements.
- Sheets will be provided to indicate the intent of the new installation and materials required at each intersection.
- Exclusions (provided by city): material selection, traffic study, crash history, intersection facts, traffic count

Construction Engineering & Inspection = \$12,500:

- Construction inspection, material review, RFI responses, coordination between city and contractor, verification of compliance, all typical CE&I responsibilities during pre-construction, construction, and final closeout

Total Fee = \$35,000 (Additional work outside of scope shall be performed at hourly rates.)

As we discussed the Lando Cain PE budget is running over. Are you good to add \$50,000 to it, per below?

Jud,
It looks like another \$48,500 (\$38,800 federal and \$9,700 match) was added back in February 2023, but I can't find any documentation of that getting approved, so it may have gone through Barrett. It does look like the two cuts that are on this PE are overrunning, like the e-mail says. If more funds are needing to be added, hopefully you know how much to request, but I would just shoot an e-mail to Dewayne and ask him if the Decatur MPO approves adding that amount. Let me know if he does and I'll get a mod sent to FHWA to add those funds.
