

Connect The Community With City Hall

with e-government solutions from E-Gov Link

Empower the Public to

- Get the information they want—when they want it
- Alert City Hall to their concerns
- Share their opinions with officials

Empower City Hall to

- Keep the public informed and be informed by the public
- Get more work done with fewer interruptions
- Promote the city to residents and businesses

E-Gov Basics turns an ordinary website into a powerful tool. Includes robust Citizen Request Management tools, FAQ's, documents, calendars, and much more.

CommunityLink drives community involvement using exciting new internet technologies, such as social networking.

Website Redesign with Content Management puts city staff in control of a great looking new website that's easy to use.

E-Gov ParksLink gives the city better control of recreation programs while giving the public the ability to register and pay online for classes, facilities, pool passes and more.

E-Gov PermitsLink lets the city manage the whole building permits process including applications, fees, reviews, inspections, forms, and reports.

About E-Gov Link Applications and Hosting

- All E-Gov Link solutions are provided as hosted applications, which means our clients do not need any extra internal hardware or software to use them—just internet access and ordinary web browsers.
- E-Gov Link applications are hosted in a Class 1 hosting facility with power backup and tight physical security. E-Gov Link handles all system maintenance and backups.

About E-Gov Link

- E-Gov Link has been providing technology solutions to local governments since 1996.
