618000 - LAKE OPERATIONS

618000 - LAKE OPERATIONS SUMMARY

The Lake Operations Department manages the Town-owned 728 acre recreation lake including: enforcement, permitting, lake inspection and controls, inspection and enforcement of environmental regulations, water sampling and testing programs, dredging operations, fisheries and lake activities.

PROJECT DESCRIPTION	PRIORITY CODE	FY 18-19	FY 19-20	FY 20-21	FY 21-22	FY 22-23	FUTURE	TOTAL

Town of Lake Lure
Capital Improvement Plan - Project Summary Form

Project Title: Marina and Boardwalk Replacement
Department: Lake Operations
Acct. Number: 10-800000

Departmental Priority: 1
Organizational Priority: 2

Purpose: Health, Safety and Welfare ☐ Mandate ☐ Renovation/Replacement ☒ Expansion ☐

Description: This project replaces the Town's Marina Building and Boardwalk and adds additional boat slips around Marina Bay. The new design is based on the Lake Lure Seawall and Concourse Project Site Plan developed in June 2015 and the Rutherford County Tourism Strategic Plan being developed this year. The new Marina building is 5,000 square feet and is estimated to cost \$ 1,500,000. The new Marina Building will function as visitor center, gift shop and restaurant. The Boardwalk is estimated to cost \$1,200,000. It is also proposed that the boat slips be relocated to around the boardwalk expanding the number of available slips. The total cost for all projects is \$3,700,000 and will be funded through a combination of public and private funding and partnerships.

Justification: The boardwalk was built in 1991 and is need of constant repair and renovation. Aside from wood rot and weathering, the footings are becoming unstable due to scour. Identified in the 2007-2027 Comprehensive as a priority, the new design incorporates landscaped parking, a seawall, greenway, seating and overlook area. The new boardwalk is identified in the Town Center Plan and is important to pedestrian connections between Morse Park and the Town Center. The new Marina, boardwalk and boat slips are identified as a need in the Tourism Strategic Plan.

Town of Lake Lure
Capital Improvement Plan - Project Summary Form

Project Title: Vehicle and Boat Replacement
Department: Lake Operations
Acct. Number: 10-800000

Departmental Priority: 2
Organizational Priority: 11

Purpose: Health, Safety and Welfare ☐ Mandate ☐ Renovation/Replacement ☒ Expansion ☐

Description: This project replaces the 2008 Chevrolet Silverado and 1996 McKee boat. The truck is used primarily for the Lake Operations Director as a police and emergency response vehicle for Town and lake emergencies. The truck is also used for hauling boats and supplies and traveling to and from training. It is proposed that the truck be replaced with a new 4x4, four cylinder diesel engine truck, which will improve fuel mileage and provide the necessary towing capacity. The new boat will become the primary police patrol boat and the current police boat will become the secondary patrol and inspections boat. The truck is estimated to cost \$43,000 and the boat is estimated to cost \$60,000. Both are proposed for financing at four percent over five years.

Justification: The 2008 truck now has over 127,000 miles and like other similar vehicles should be replaced on a ten year, 100,000 mile schedule. While maintenance costs are increasing, it proposed that this truck replace the Environmental Management Officer's vehicle, which is unreliable based on its age, maintenance needs and high miles. The boat is 21 years old and was bought used from the N.C. Wildlife Resources Commission. While currently being used as a secondary police boat and inspections boat, the boat is requiring more frequent maintenance due to its age.

Town of Lake Lure
Capital Improvement Plan - Project Summary Form

Project Title: Lake Operations Boathouse
Department: Lake Operations
Acct. Number: 10-800000

Departmental Priority: 3
Organizational Priority: 23

Purpose: Health, Safety and Welfare ☐ Mandate ☐ Renovation/Replacement ☒ Expansion ☒

Description: This project constructs a 72 feet long by 45 feet wide aluminum boathouse to house all town-owned boats. Slips and lifts will be provided for the fire boat, police boat and the back-up police/inspections boat. Two additional slips will be provided for the two work boats. There also will be room for three public temporary moorings on each end of the boathouse. The project is estimated to cost \$175,000 and is proposed to be financed for ten years at a 4% interest rate.

Justification: At present, town boats are kept in two locations - Marina Bay and near the Dam. The 2007-2027 Comprehensive Plan indicates that the Marina Bay boathouse area has a higher and better commercial use and as such, all boats should be relocated to an area that has deep water access, is easily accessible, and not exposed to the elements. The small boathouse at the dam does not meet this need due to its small size, location and design. The new boathouse is proposed to be located near the Lake Operations Building.

Watershed Study

Lake Operations

10-800000

4

D

7

☒

This project involves conducting a watershed study and inventory of sediment sources in the 94 square mile Upper Broad River Watershed. The study would evaluate sediment sources and their impact to Lake Lure in terms of sediment loading, with cost analysis of sediment removal versus on-site repair. Such a study would identify potential stream restoration projects, slope stabilization projects, new regulations and land protection priorities.

The Lake Lure Watershed Study would give the Town the opportunity to partner with neighboring jurisdictions to accomplish joint planning efforts to address the Lake Lure sedimentation issue. The goal of such a plan would be to implement site stabilization projects, protect riparian corridors and adopt regulations to mitigate impacts, thereby reducing the amount of sediment entering the lake. Conducting a Watershed Study is identified as a need in the 2007-2027 Comprehensive Plan in order to improve and maintain water quality for the enjoyment of the community and to support natural habitats.

Town of Lake Lure
Capital Improvement Plan - Project Summary Form

Project Title: Tuff Boom Installation
Department: Lake Operations
Acct. Number: 10-800000

Departmental Priority: 5
Organizational Priority: D

Purpose: Health, Safety and Welfare ☐ Mandate ☐ Renovation/Replacement ☐ Expansion ☒

Description: The projects installs a Tuff Boom barrier to catch debris in the river channel before it enters the main body of the lake.

Justification: This barrier would be deployed prior to storm events for the purpose of catching debris before it reaches the main channel of the lake. Debris that extends into the main channel of the lake restricts navigation and may require extensive and sometimes expensive efforts to remove. The installation of the barrier would provide easier and safer access for removal, saving both time and money.

Town of Lake Lure
Capital Improvement Plan - Project Summary Form

Project Title: Exterior Renovations to Lake Operations Office
Department: Lake Operations
Acct. Number: 10-800000

Departmental Priority: 6
Organizational Priority: C

Purpose: Health, Safety and Welfare ☐ Mandate ☐ Renovation/Replacement ☒ Expansion ☐

Description: This project would remodel the building exterior of the Lake Operations Department. Exterior renovations would include replacing the vinyl siding with stucco, landscaping and paving of the parking lot. The building remodeling would be in keeping with the Lake Lure Dam Overlook Park Conceptual Masterplan developed in 2014.

Justification: The interior of the Lake Operations Building was renovated for Town offices in 2010. In 2015, the building was upgraded with an emergency generator system for the dam and for use during emergencies. The roof was replaced in 2016. The second phase of the plan included exterior improvements with the idea that the building and dam would be focal points of the Lake Lure Dam Overlook Park. The building would create continuity with the Mediterranean Architecture of public facilities highlighting the 1926 Hydroelectric Dam.

Town of Lake Lure
Capital Improvement Plan - Project Summary Form

Project Title: Boat Ramp Access Control
Department: Lake Operations
Acct. Number: 10-800000

Departmental Priority: 7
Organizational Priority: D

Purpose: Health, Safety and Welfare ☐ Mandate ☐ Renovation/Replacement ☐ Expansion ☒

Description: Provides electronically raised access arms at public motorized boat ramps. This equipment would be installed at the Marina and Rumbling Bald Resort access ramps.

Justification: Access arms are needed to better control public access to the lake. With installation, the Town can help mitigate the introduction of invasive species, limit access during storm events and other emergencies, and ensure that access is only granted to those with proper permits.

Project Status: Unfunded ☒ Partially Funded ☐ Funded ☐
