

Damage from the July 24, 2010 Storm

Both the State of Illinois and Cook County have declared Cook County a disaster area following the recent storm of July 24, 2010. These are preliminary steps in securing federal emergency management (FEMA) financial assistance. If the President of the United States also declares the area a disaster, then there is potential for individuals (residents and businesses) that experienced damage to receive financial assistance.

At this time, it is not known if the President will declare this a disaster. Furthermore, until the specifics of the Federal declaration are known it is unknown if there will be assistance.

Since the federal declaration for individual assistance is based on the number of structures that incurred damage, it is helpful for individuals to report flooding to the Village. In order for the Village to obtain needed information and secure necessary declarations please fill out the form that follows.

As more information becomes available the Village will continue to update the web site. If you have further questions please contact the Public Works Department at 847/933-8427.

Village of Skokie, IL
Storm Damage
Data Collection Questionnaire

*For support in completing this form contact the
 Village Manager's Office at 847 933-8210*
