

# TOWN OF SOMERS

600 MAIN STREET  
P.O. BOX 308  
SOMERS, CONNECTICUT 06071

Dear Neighbors,

The Planning Commission is updating the Plan of Conservation and Development for the Town, focusing on the section concerning community needs. The plan serves as a guide in developing or modifying regulations and services, based upon the expressed interests of the community. The current plan is available on the town website, along with the action steps.

For us to be successful in developing a plan that is reflective of community expectations we need your help. The Commission, with significant assistance from two Political Science interns from Eastern Connecticut State University, has developed the attached survey. Please take a moment to complete and return it either in the postage paid return envelope, or if you prefer, drop it off at the land use office in Town Hall. **All responses to this survey are anonymous, and the results will only be presented in aggregate form, further protecting your anonymity.** Your prompt response is appreciated both by the Commission and our intern who needs to interpret the data before the end of the semester. The collected information, and draft plan language, will be shared at an informational meeting later this year.

The Commission wishes to publicly thank Bryan Jorge and Andrew Minikowski, our interns, for their work in documenting our progress as well as developing and soon interpreting the survey. We also thank you for your anticipated guidance in assuring that our future goals help us continue to build a community of which we may all be proud.

Sincerely,

Brad Pellissier  
Planning Commission Chairman
