Traffic Calming Study

Hosbrook Road Corridor

Executive Summary

Excessive speed has consistently been an issue along Hosbrook Road in Sycamore Township. With new proposed developments at the northern end of Hosbrook Road, residents are concerned about additional traffic and speed. Hosbrook Road, while residential in land use, is functionally classified as a collector road. The purpose of this report is to look at traffic calming measures that can be implemented along Hosbrook Road that mitigate speed while still allowing the functional use of the road.

The Institute of Transportation Engineers defines traffic calming as the following:

Traffic calming is the combination of mainly physical measures that reduce the negative effects of motor vehicle use, alter driver behavior, and improve conditions for non-motorized street users.

The contents of this report show that many traffic calming measures were evaluated as a means of reducing speed along the Hosbrook Road corridor. Section IV lays out the overall list of alternatives that are available within the engineering “marketplace” by which traffic calming measures can be implemented. These options were then reduced to four alternatives for further evaluation.

The four alternatives that were examined in greater detail were chosen by the Traffic Calming Committee which was comprised of officials from Sycamore Township, the City of Madeira, the Hamilton County Engineer Office, and residents on Hosbrook Road. The Committee meetings were open to the public.

The four alternatives presented are titled:

- Streetscape Alternative #1
- Streetscape Alternative #2
- Roundabouts
- Gateways and Markings

These alternatives were presented to the public at a meeting on February 11th, 2009. The comments from that meeting, along with input from the Traffic Calming Committee were used to create the Preferred Alternative. This alternative is combination of Streetscape Alternative #1 and the Gateways and Markings Alternative. The implementation of this calls for the construction of new sidewalk and curb on the west side of Hosbrook Road, high visibility crosswalk markings and signage at each intersection, islands at selected intersections, and lighted crosswalks crossing Hosbrook Road at each intersection. The proposed elements included in the prepared alternative are to be used as a guideline once the decision has been made to move forward with the design process. The total cost for the Preferred Alternative is \$1,540,000. A funding source for the implementation of the preferred alternative has not been determined at this time. Both the County and the Township would have to go through a separate public hearing process prior to assessing any property owners for the installation of sidewalks.

Introduction

I. Introduction

Every community has distinct traffic patterns by which drivers become comfortable in their use. These routes are traveled frequently and evolve into collector roads for neighborhoods and districts. The evolution of these streets is usually a function of the history by which the community developed, and the associated traffic patterns of surrounding communities.

Main routes in residential areas function as a focal point for community activities such as pedestrian walkways, bikeways, and children's activities. As a result, vehicle speed must be controlled to reduce the opportunity for safety problems. When vehicles are driving at high speeds they have less time to react and the opportunity for accidents increases.

The Institute of Transportation Engineers (ITE) understands the importance that traffic calming has to communities and has developed the following as a standard definition of traffic calming:

Traffic calming is the combination of mainly physical measures that reduce the negative effects of motor vehicle use, alter driver behavior, and improve conditions for non-motorized street users.

As a result, the overall goal of traffic calming is to improve conditions for pedestrians and bikers – all non-motorized users. The “Center for Transportation Research and Education” at Iowa State University compiled a study on the effect of various techniques for meeting the goals of traffic calming. In their analysis they conclude that reducing speed is a function of ***changing drivers perception*** of what is a safe speed in relation to roadway design. This includes the roadways width, grade, curvature, and turning radius. They state that the physical narrowing of a roadway does lead to reduced speeds while at the same time, a perceived narrowing of the roadway through pavement markings and landscaping can also have the same effect. Additional technical data regarding these conclusions can be found in the October 2007 Final Report available at www.ctre.iastate.edu.

Field Survey and Examination

II. Field Survey and Examination

Mr. Chris Jones performed a field survey along Hosbrook Road. The focus of the field activity was to evaluate the road conditions as well as utility locations to determine available roadway widths for potential improvements. A sign inventory was also completed and is shown on the alternative sheets.

Speed data was collected for three weeks along Hosbrook Road using a speed trailer and data collector. The data from the speed measuring device was used to evaluate average and 85th percentile speeds along Hosbrook Road. The 85th percentile speed was 33.4 mph.

The speed was collected in two ways using the speed trailer. The trailer has the capability of displaying the driver's current speed on a display board which is large enough for the driver to see. One set of data was obtained with the display device in the "ON" position, while another set of data was obtained with the display device in the "OFF" position. The tables on the following pages provide detailed information on the data gathered.

A comparison of the data shows that with the display "ON" versus "OFF", the 85th percentile speed was reduced 1.4 mph. In addition, 63% of the vehicles drove 5 mph or more over the speed limit when the display was "OFF", while only 46% of the vehicles drove 5 mph or more over the speed limit when the display was "ON". This is a net reduction of 27%.

Traffic volumes were collected at 9 intersections in the study area. These volumes were used to evaluate current traffic patterns and level of service at the major intersections in the study area. A summary table of the traffic volumes is included in this report.

Community Survey

III. Community Survey

A community survey was collected using the online resource Survey Monkey. The survey was used to determine concerns of the citizens in the Hosbrook Road area with regards to speeding, congestion, sidewalks, and various other issues.

A copy of the survey is included in the Appendix. In addition, a summary of the results along with selected written responses is also included in figure 9.

Over 250 responses to the survey were received. Figure 10 shows the locations of responses. All of the responses were located in either Sycamore Township or the City of Madeira.

Of those who responded to the survey, over 50% prefer to have sidewalks installed on Hosbrook Road. 48% of the respondents would prefer to have bike paths installed on Hosbrook Road. Most of the residents stated that their main traffic related concerns along Hosbrook were at the intersections of Hosbrook Road/Montgomery Road and Hosbrook Road/Euclid Avenue. There were also concerns regarding drivers making left hand turns into the TGI Fridays development from southbound Hosbrook Road.

Community Survey

Recommended Traffic Calming Alternatives

IV. Recommended Traffic Calming Alternatives

The following alternatives listed in this study are the choices available to the Township to mitigate vehicle speed along the Hosbrook Road Corridor. The matrix at the end of this section compares each alternative across four categories. The recommended alternatives are listed in no particular order.

A. Additional Speed Enforcement/Radar Trailers

Additional speed enforcement is a temporary control device, which can be used by Township staff. The radar trailer can have some similar benefits; however, it can be done at a greatly reduced personnel cost.

Advantage:

With the addition of police officers on streets, speed enforcement gives an immediate and noticeable presence. It can have positive short-term effects. The installation of the temporary trailer will provide a longer-term benefit of educating drivers as to their actual speed

Disadvantage:

The disadvantages of speed enforcement are that it is very labor intensive and prevents police from addressing other community needs. Additionally, it is not a long-term solution. The effect of a radar trailer can get desensitized over time as people become conditioned to its location.

B. Permanent Speed Education Devices

The installation of permanent speed education devices has become more popular in recent years as a means of permanently reducing traffic speeds. They are most visible in high accident areas on interstate highways due to the excessive speeds by a variety of vehicle types.

Recommended Traffic Calming Alternatives

They are also appropriate for residential areas because they can be a constant reminder that speed is an issue. The latest designs of these devices provide for a compact installation, which can be mounted on existing poles or adjacent to the roadway edge.

Advantage:

An advantage is that they are less intrusive to the neighborhood than the trailers, which will make them easier to implement and keep in service.

Disadvantage:

After a period of time, drivers can be desensitized to the devices. These devices will still have an impact for the driver who is not a regular user of the roadway.

C. Lane Striping

Lane striping can be used as a non-vertical solution to traffic calming. It would include center yellow striping along with white edge lines plus chevrons at strategic locations. These are highly visible markings and can be installed at little cost, while encouraging drivers to slow down.

Advantage:

Advantages would be that it is inexpensive to install and has no impact to emergency response.

Disadvantage:

Disadvantages are that it increases maintenance costs and its affect on drivers can be diminished over time.

D. High Visibility Crosswalks

These crosswalks would be installed at all locations of street crossings and designed to clearly delineate the location of a crosswalk. This would be in addition to signage, which would be required at these locations.

Advantage:

Advantages would be that the crosswalks are inexpensive to install and have no impact to emergency response. High visibility crosswalks increase the visibility for pedestrians in the area.

Recommended Traffic Calming Alternatives

Disadvantage:

Disadvantages are that they require additional maintenance than traditional crosswalks and provide pedestrians with a false sense of security given the traffic conditions.

E. Speed Humps/Tables

Speed humps and speed tables are the most common and visible means of addressing traffic calming. Speed humps are typically a rounded layer of asphalt that is approximately six inches in height. Speed tables are a larger alternative whereby a flat surface of roadway is elevated 3 to 6 inches for approximately 20 feet.

The size of speed tables is based upon ITE design criteria and is based upon a 35 mph design speed. Their recommendation calls for the tables to be a total length of 22 feet. This allows for a 10 foot table and 6 foot ramps. The typical height is 3 or 4 inches, but can be up to 6 inches. An estimated cost for the installation of the tables is between \$5,000 and \$10,000 a piece. This range accounts for the variation in the height and choices regarding striping alternatives.

Advantage:

Advantages are that speed humps and tables can be installed on most streets with minimal impact to the roadway drainage patterns. They are also viewed by the public as a visible and permanent means of controlling speed on streets. Studies performed by the Center for Transportation Research and Education (CTRE) show that 85th percentile speeds are reduced by up to 10 mph at locations where speed humps or tables are installed.

Disadvantage:

Speed humps and speed tables can present delays by emergency personnel responding to calls. They will have to reduce speed when approaching speed humps and tables to prevent damage to their vehicles. In addition, the humps and tables present a maintenance concern for snow removal because these devices can damage plow blades.

Recommended Traffic Calming Alternatives

F. Raised Crosswalks

Raised crosswalks are similar to speed tables but they have crosswalk markings and are located at strategic locations for pedestrian access.

Advantage:

The advantages are that they are effective in reducing speeds. They increase visibility for pedestrians and slow vehicle traffic at conflict points with pedestrians.

Disadvantage:

The disadvantages are that raised crosswalks slow emergency vehicles and buses. They have a potential negative impact on the drainage systems.

G. Bulbouts

Bulbouts can be installed at intersections along the lengths of the roadway. They narrow the street to help facilitate pedestrian movements and reduce speeds on the approaches.

Advantage:

The advantages of bulbouts are that they reduce vehicle speed near the intersection and make pedestrian crossing safer and easier.

Disadvantage:

The disadvantage is that they affect turning movements for larger vehicles. The construction of the roadway at the intersections reduces the available turning radius for drivers.

Recommended Traffic Calming Alternatives

H. Rumble Strips

Rumble strips are typically installed at approaches to intersections where drivers need to be reminded to slow down. These are typically used in rural areas or away from residential areas.

Advantage:

Rumble strips can provide an inexpensive means of reminding drivers to slow down.

Disadvantage:

Rumble strips cause high levels of noise pollution to surrounding houses. This increase in noise takes place 24 hour a day.

I. Pavement Marking Legends

These are speed limit or other words painted on the pavement to alert drivers of the posted speed limit.

Advantage:

Advantages of pavement marking legends are that they are inexpensive to install and have no impact to emergency personnel.

Disadvantage:

Disadvantages are that it increases maintenance costs and its affect on drivers can be diminished over time.

J. Raised Pavement Markers

These markers can be installed at strategic locations within the project corridor to more clearly delineate the centerline or edge-line of a roadway. They are most often used on horizontal curves; however, they could be used on vertical curves.

Advantage:

Advantages are that they are inexpensive to install and have no impact to emergency response.

Disadvantage:

Disadvantages of these markers include an increase in noise and the high probability that they would be removed during the snow-removal process.

Recommended Traffic Calming Alternatives

K. Streetscaping

This traditionally includes the installation of a planting area between the street and a sidewalk. The Hosbrook Road implementation will most likely require a curb to be installed adjacent to the sidewalk for drainage purposes. The curb itself will act as a traffic calming device by narrowing the effective width of the road.

Advantage:

Advantages of streetscaping are its positive aesthetic effect along the project corridor. The addition of lighting and sidewalk elements cause the driver to reduce their speed.

Disadvantage:

Implementing a streetscape design is a costly endeavor and impacts the entire corridor. It will remove the suburban nature of the neighborhood and dramatically change its character.

L. Gateways/Entryways

Both provide a visual notification to the drivers that they are entering a neighborhood or commercial district. This helps make the area appear more as a destination rather than a means of using that road as a way to get from point A to point B.

Advantage:

Advantages are that they may reduce volumes. They have a positive aesthetic effect and have good functionality. They also improve the quality of life for the neighborhood.

Recommended Traffic Calming Alternatives

Disadvantage:

The disadvantages are that they potentially carry great vehicular hazards and can create poor visibility conditions.

M. Traffic Circles

These provide a circular operation at an intersection rather than either, a two-way, or four-way stop. The vehicles on a thru street must change their travel path in order to navigate through the traffic circle.

Advantage:

Traffic circles require the driver to slow down upon entering the intersection to navigate the circle.

Disadvantage:

Traffic circles take up a large area and can impact drainage patterns. They usually require the acquisition of land for construction purposes. The circles can prevent certain large vehicles from navigating the street without a means of providing an alternative route. Large vehicles could also cause traffic backups.

Recommended Traffic Calming Alternatives

Table 1: Matrix of Alternatives and Associated Impacts

	Speed Reduction			Volume Reduction			Noise Increase			Cost		
	Low	Med	High	Low	Med	High	Low	Med	High	Low	Med	High

Selected Alternatives and Preferred Alternative

V. Traffic Calming Committee Selected Alternatives and Preferred Alternative

A series of four traffic calming alternatives were forwarded from the recommendations stage and evaluated further as a set of selected alternatives by the Traffic Calming Committee. These four alternatives were then presented to the general public at a meeting on February 11th, 2009. The comments from the general public are included in the Appendix to this report. The four alternatives were then revised to a single "Preferred Alternative" by the Traffic Calming Committee on March 12th, 2009. A copy of the four alternatives, the preferred alternative, and the associated cost estimates is included in this section of the report.

A. Streetscape Alternative #1

The alternative labeled "Streetscape Alternative #1" is shown on plan sheets C-301 through C-304. This alternative shows the construction of a sidewalk with a concrete curb on the west side of Hosbrook Road from just south of the existing Duke Realty Building to Euclid Avenue. The sidewalk will create a visual and vertical barrier for drivers traveling on Hosbrook Road. The curb and sidewalk will make the driver feel as though the roadway is narrow which can result in lower speeds.

The exhibits show that the sidewalk will most likely be able to be constructed within the available right-of-way of Hosbrook Road. However, grading easements will need to be acquired from the residents in order to provide the appropriate amount slope from the proposed elevation to the existing ground.

In addition to the sidewalks, intersection modifications were added to this alternative as a means of slowing vehicle speeds at intersections. The addition of a median at the intersection will provide another visual and vertical barrier for drivers as they drive the length of Hosbrook Road.

The cost estimate included in this report shows that the overall cost of this alternative will be approximately \$1,015,500.

B. Streetscape Alternative #2

The alternative labeled "Streetscape Alternative #2" is shown on plan sheets C-401 through C-404. This alternative would be considered a full streetscape because it includes new sidewalk on both sides of the street and a center island raised median with new street lighting. The exhibit shows that the new median would be constructed for nearly the entire length of the roadway and would preclude vehicles from making left turns, except at intersection locations. The new curb on both sides of each lane would create the visual and vertical barrier that leads drivers to slow their speed.

The alternative would also significantly alter the daily traffic patterns of residents along Hosbrook Road. Most would not be able to make left turns into or out of their driveway and would then be forced into making U-turns at median breaks. Due to the overall width of the construction, easements and/or right-of-way would need to be acquired from residents along Hosbrook Road on both the east and west side of the roadway.

Selected Alternatives and Preferred Alternative

The cost estimate included in this report shows that the overall cost of this alternative will be approximately \$2,216,625.

C. Roundabout Alternative

The alternative labeled “Roundabout” is shown on plan sheets C-201 through C-205. This alternative would construct roundabouts at three intersections along Hosbrook Road. The diameter of the roundabout is the minimum that could be constructed to meet the design criteria for school buses and other vehicles which utilize this roadway. The roundabout design would require that drivers reduce their speed significantly as they enter the roundabout.

The diameter of the roundabout and the proximity of the houses to the intersection would require that four homes would be acquired in order to build the new intersection. The cost estimate of \$1,143,000 for all three intersections does not include an allowance for property acquisition and relocation expenses. These expenses are significantly higher than the construction cost of the actual roundabout.

D. Gateways and Markings Alternative

The alternative labeled “Gateways and Markings” is shown on sheets C-501 through C-504. This alternative would build two new gateway signs on the northern and southern end of Hosbrook Road. The signs would be design and located in such a location as to alert drivers that they are entering a residential neighborhood. Once the driver understands that they are in such a neighborhood, then they should adjust their speed accordingly.

The markings portion of the alternative will install high visibility crosswalk markings and signage at intersections within the Hosbrook Road corridor. The markings will alert drivers that they are approaching a crosswalk where there could be a potential for pedestrians crossing the street. In addition, an “In-Pavement Lighted Crosswalk” could also be installed for increased visibility at night.

The cost for the gateways and markings component is minimal at under \$20,000. The “In-Pavement Lighted Crosswalk” costs approximately \$75,000 per each leg of the intersection. The cost to install them at each intersection for each Hosbrook leg would be approximately \$450,000.

E. Preferred Alternative

The Preferred Alternative from the Traffic Calming Committee is a composition of the “Streetscape Alternative #1” and the “Gateway and Markings Alternative”. By combining the qualities of each alternative into a single design solution, it will give the residents and drivers along Hosbrook Road the changes to the roadway that will be needed to create a physical and visual impediment to slow the speed of traffic. The total cost for the Preferred Alternative is \$1,533,660.

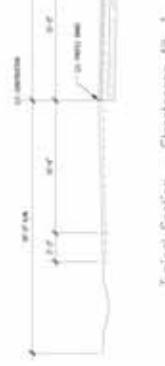

It is noted that the “In-pavement Lighted Crosswalk” are included in this alternative as an option. The final decision regarding the use of this feature will be determined at the final design phase.

Hosbrook Road Questionnaire #1

1. Personal Information

Thank you for visiting this survey and taking the time to offer your perspective on Hosbrook Road. The survey is the first of two online tools which will help gauge public opinion with respect to traffic calming on Hosbrook Road. It is important that all information on this page be completed in order for the results to be saved.

Your input will be included with comments from other citizens in order to more fully understand the existing conditions in the Hosbrook Road corridor.

1. Please fill out all fields entirely.

Name:	<input type="text"/>
Address:	<input type="text"/>
Address 2:	<input type="text"/>
City/Town:	<input type="text"/>
State:	<input type="text"/>
ZIP/Postal Code:	<input type="text"/>
Email Address:	<input type="text"/>
Phone Number:	<input type="text"/>

Hosbrook Road Questionnaire #1

2. Current Conditions

1. Do you perceive speeding to be a problem along your street?

- Yes
 No

2. If Yes, please rate the severity of the problem.

Severity of Speeding	Small Problem	<input type="radio"/>	<input type="radio"/>	Problem	<input type="radio"/>	<input type="radio"/>	Severe Problem	<input type="radio"/>	N/A	<input type="radio"/>
----------------------	---------------	-----------------------	-----------------------	---------	-----------------------	-----------------------	----------------	-----------------------	-----	-----------------------

3. Is congestion a problem on Hosbrook Road?

- Yes
 No
 I don't know

Please describe the basis for response.

4. If Yes, please rate the severity of the problem.

Severity of Congestion	Small Problem	<input type="radio"/>	<input type="radio"/>	Problem	<input type="radio"/>	<input type="radio"/>	Severe Problem	<input type="radio"/>	N/A	<input type="radio"/>
------------------------	---------------	-----------------------	-----------------------	---------	-----------------------	-----------------------	----------------	-----------------------	-----	-----------------------

5. Do you find it difficult to make left turn movements onto side streets from Hosbrook Road?

- Yes
 No
 I don't know

Please describe the basis for response.

6. Would you prefer to see sidewalks installed on Hosbrook Road?

- Yes
 No
 I don't know

7. How often would you and/or your family use sidewalks?

Sidewalk Usage	Not at all	<input type="radio"/>	Once a week	<input type="radio"/>	Two or three times a week	<input type="radio"/>	Daily	<input type="radio"/>
----------------	------------	-----------------------	-------------	-----------------------	---------------------------	-----------------------	-------	-----------------------

Appendix B – Sycamore Township, Ohio Speed Study Results

		In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
City/Town: Madeira	Open-Ended Response	We need speed bumps on Shewango Way. Cars cut through this street to get from Miami to Hosbrook. Many of them speed, making the street dangerous for the children who walk and bicycle on it. I always hope that no child will get hurt or killed on Shewango Way.	Same as above.
Madeira	Open-Ended Response	People, often the students, speed up/down Loarnes Drive. The majority do not stop at the stop sign.	Speeding up/down Loarnes Drive and on Miami Avenue is an issue. Another major issue I have found is people running the light on Miami Avenue @ Loarnes Drive. I have almost been hit several times crossing by people either speeding to beat the light, or not paying attention to the light. Although signs and lights have been added to pedestrian crossing on Miami Avenue @around Laurel people still fail to yield to pedestrians.
Madeira	Open-Ended Response	speed humps installed speed limit signs posted on north timberlane, monitor that people stop for pedestrians at crosswalk at corner of miami and miami hills.	Speeding in the major concern. It makes it unsafe on my street for children playing and people walking. Sidewalks would make it somewhat safer but would not get rid of the speeding. Hosbrook is becoming a very busy street. It is sometimes difficult to make a left turn onto Hosbrook, mostly because of the traffic and because of trees blocking the view. People drive fast on n. timberlane. on hosbrook it is difficult to only go 25 mph- it feels like a 35 mph street.
Madeira (Cincinnati)	Open-Ended Response	speeds humps everywhere. toll gates, add gates to my road. need police to monitor road. will bring big \$ to madeira.	need to make wider, taking extra space from sycamore side, buy houses on madeira side, turn into green space and add sound barriers. If lights are added, make sure they are the ones with little light pollution, directed lighting, need sidewalks on hosbrook, sycamore side. if circles installed then need about 100 of them along hosbrook, at every driveway. hosbrook stinks, more offices means more stink. sycamore needs to do something about the poop. It can't be madeira council, they can't get their shit together, traffic will just enter side streets, ruined ambience.
Madeira (Cincinnati)	Open-Ended Response	The problem lies at the intersection of Hosbrook and Montgomery which then translates to back-ups onto Hosbrook making it hard to turn from Shewango onto Hosbrook going either directions. Becomes a dangerous situation with frustrated drivers who are impatient waiting on Hosbrook for the light at the intersection of Montgomery and Hosbrook.	Our concern remains the same as documented to City Manager Tom Moeller for the last several years and has to do with the inadequate rain water drainage system on North Mingo Lane. We already have consistent street overflow with heavy rains and with only one drainage area all the water flows only to it rather than gradually being reduced if there were more drainage openings on North Mingo for the water to flow into rather than all of it heading to one area and creating a bottleneck effect. It seems a simple solution for the city to add more drainage openings on North Mingo at the very least though the drainage system is archaic and inadequate for today's times. Any money that comes from the city should first go to remedying this water drainage system issue that has been repeatedly documented to Mr. Moeller without any efforts on the city's part to take responsibility to remedy the problem, at least with the additions of more drainage openings. If they were to then alter the land/ground with additional sidewalks, construction, bike paths, etc. the water problem could be even further intensified for the residents of North Mingo, a great majority of whom are unhappy with the current rain water drainage system on our street.

Madeira	No				
Madeira	No			Because of the changing levels in the distance of the road itself, it is sometimes difficult to be assured that oncoming traffic is "clear" to safely commence and complete the turn.	
Cincinnati	No			Yes	
Cincinnati	No			Yes	
				No	
Cincinnati	No			No	
Madeira	No			I don't know	
Cincinnati	No				
Madeira	No				
Madeira	No		I don't know, but I know that people turn left into the "Friday's" parking lot do. They cause a backup onto Montgomery, and it is a potential hazard for accidents, since people turning off Montgomery don't expect to have to stop so soon. If they "closed" the first driveway into the Mexican restaurant, this problem would be minimized, and cars would have to turn left into the second driveway, which is further down Hosbrook. The people exiting the "garage" onto Hosbrook often take their lives into their hands as they dash onto Hosbrook. This is an area for possible improvement.		
Madeira	No

		In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road? Being planned	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Madeira	Cincinnati	My current street, N. Mingo Lane, is safe. It is a little less safe on Shewango Way and Hosbrook Road.	Congestion between Lynfield and Montgomery Rd and pedestrian safety
Madeira	Cincinnati	Speed limit monitored and/or enforced, regularly. Encourage property owners to trim and keep heavy foliage and landscaping from blocking visibility near to the street. At heavy traffic hours (8:00-9:30 AM, 11:30-1:30 PM, 4:30-6:00 PM) it is extremely difficult to exit our driveways, but even more so with this additional problem.	Due to the speed of cars traveling on Hosbrook Rd it is difficult to back out of our driveway to the street. I would like more radar enforcement!
Madeira	Gurnee	More radar enforcement!	
Madeira	Cincinnati	I don't have any	Our concerns involve, of course, the proposed development at the Montgomery/Hosbrook site. Like most other residents on Hosbrook, we certainly don't want to exposed to heavier traffic than is currently a problem. Children do live on this street and while all of them are very cautious and rarely are near the street for any reason, it would be nice to see sidewalks for families to take walks to parks or downtown. Safety must come first for all of us in the area. Increasing traffic volumes or patterns would not benefit anyone who lives along or around this Road.
Madeira	Cincinnati	I don't have any	Traffic traveling through our neighborhood on Michael Dr seems to be a little high and the rate of speed is increasing. People often do not do any better than slowing down at stop signs at Nodding Way, Quailhollow, Tiki and there are often children and pedestrians on the streets. I would like to see some patrols posted in the neighborhood temporarily to deter this activity.
Madeira	Cincinnati	I don't have any	It seems that this particular survey is centered on the topic of Hosbrook, but I would argue that the stretch of Euclid Avenue where we live would be greatly enhanced by a sidewalk/bikepath on at least one side leading into downtown Madeira. Foot/bike traffic definitely exists, but pedestrians are relegated to walking in someone's yard or using the dangerous, narrow shoulder area.
Madeira	Cincinnati	I think teen-agers should not be allowed to drive on my street. They seem to be the majority of the speeders).-> But seriously, there is a very large pine tree in the yard on the bend of N. Timberlane that blocks the view ahead of you around the bend. If that was removed, my street would be safer, as my kids are always riding bikes and scooters in the street. I only have a few issues with Hosbrook: 1) the first few hundred yards of Hosbrook (on the montg. end) can be a hazard. If there is a way to "cut off" that area in some way (from non-Madeira resident traffic), that would help. If the businesses there would re-direct their traffic, (doubtful on if Hosbrook was widened to four lanes (or 3 with a turn lane) for a few hundred yards, I think that would improve the situation greatly.	Hosbrook is not a very big concern to me, except that it is a cut through to Euclid. Both Euclid, the intersection of Euclid and Miami, and the intersection of Dawson and Miami on the bend of N. Timberlane that blocks the view ahead of you around the bend. If that was removed, my street would be safer, as my kids are always riding bikes and scooters in the street. I only have a few issues with Hosbrook: 1) the first few hundred yards of Hosbrook (on the montg. end) can be a hazard. If there is a way to "cut off" that area in some way (from non-Madeira resident traffic), that would help. If the businesses there would re-direct their traffic, (doubtful on if Hosbrook was widened to four lanes (or 3 with a turn lane) for a few hundred yards, I think that would improve the situation greatly.

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Read.
Cincinnati Cincinnati	Monitor and write lots of tickets at the 3-way stop at Dawson and Eleck for the 90% of drivers that run the stop sign. Keep the speed down	Cut through traffic on Miami Hills; increasing volume of large trucks using Hosbrook rd as connector, delays in backing out of driveways (note that several homeowners are construction turn around driveways at their own expense; increasing pedestrians, many of them children, substandard drainage in some locations, very concerned that Hosbrook will become so congested that home values will decrease.
Sycamore Twp	Consistent with the Traffic Calming Study. Paid for with TIF money	My concern is total development in the area. Below are the pending or in process developments in a 2 mile radius. What are the plans to update Mont Rd to handle all of this development? Montgomery Rd development. Hosbrook Rd/Mont Rd Kubicki Development by Willie's complex Montgomery Town Center Available land next to Mercedes dealership OH Valley Ortho on Kugler Mill Available land next to Gilligan Funeral Home FBI Building + Hotel Redstone Plaza - Kenwood Rd: 6-8 apartment buildings available across from mall (Happiness Way/Frolic, etc) Galbraith Rd development by Jewish Hospital Kenwood Rd & Galbraith Rd - houses available for development I believe a focus should be on incorporating a contiguous sidewalk from Kenwood to downtown Mont along Mont Rd. and the connecting streets. I don't know why we have all of this development without providing for the safety of the residents by incorporating sidewalks along these busy corridors. Also, what is the plan to preserve greenspace? Would the township consider purchasing land for this purpose? Enforce speed limits. Widen Hosbrook Road.
Cincinnati Cincinnati	There needs to be 2 left turn lanes onto Montgomery Rd. You need to plan for the Hosbrook/Mont Rd development and the new FBI building/Hotel development. Widen Hosbrook Road.	Wheekless disregard for the speed limit and and no sidewalk. If I leave my house going either direction, my life is at risk until I get off of Hosbrook Read.
Cincinnati Cincinnati	More police patrols and traffic enforcement	The 25 mph speed limit is too low on Hosbrook. It would be too easy to get a ticket on there.
Madeira Cincinnati	A sidewalk or at least space to walk on the pavement is much needed. I exercise daily and have nearly been hit by cars numerous times. There are areas where there is nowhere to go to get out of the way of traffic. The speed limit is ignored and not enforced by HCPD.	I'd like to ensure that the issues of volume and speed also be linked to the obvious pattern of short cutting - using Shewango Way as a connector and avoiding Montgomery and other roads. I'd want to see Shewango limited to local only traffic or at least install speed bumps to both discourage speed and cut throughs. We are avid walkers and bikers, so infra structure improvements we definitely be used, and appreciated, but would NOT be considered a consolation prize/package deal linked to increased traffic. Traffic and speeding must be reduced, not just limited. I am excited to Brandstetter's involvement and hope all the forward thinking planning tools available to them can be used to these means.

Appendix B – Sycamore Township, Ohio Speed Study Results

		Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Madeira	No problems with my street that I am aware of. I think Hosbrook speed limit of 25 mph after traffic is away from the business area of the Montgomery Rd intersection should be raised to 35 because the houses are set way back from H. My entire lot could set in the front yards so there is no danger to children.	I would like to see the residential nature of our area protected. I think too many large commercial buildings are going up in our vicinity. I feel this will affect property values.
Cincinnati	It seems fine currently. Sidewalks would be a big plus. There is a lot of foot traffic and no place to walk other than the street.	If traffic becomes worse on Hosbrook, cars will cut through our neighborhoods. We have too many children, bikers, and walkers to allow that to happen.
Madeira	None needed. I see very little foot/bicycle traffic on Hosbrook. This may be due to a lack of a sidewalk. Not sure really.	Leaving Lakota onto Kenwood can be difficult. Pine tree on SW corner blocks view of northbound traffic. Hedge row on NE corner requires you to pull up with the nose of your car almost onto Kenwood to see southbound traffic. With the hill from the north on Kenwood, cars suddenly appear. Can be dangerous at times.
Madeira		speeding
Cincinnati		The total lack of speed law enforcement. The added traffic will destroy our property values. Who wants a house that you can't egress. The trustees care more about money than the people that make this neighborhood. I wish they had to put up with this mess!
Cincinnati	Stop dumping more and more traffic down Hosbrook Rd. Add stop signs at side streets. No thru for trucks. Make the police enforce the law instead of ignoring it.	I am extremely concerned that any additional traffic will greatly increase the risk for an accident. Our street is very straight and has a downhill slope. It is already very dangerous and full of commuting cars who use it as a pass through to and from Miami and Hosbrook. There is complete disregard for our neighborhood and the people who live on this street. I don't know how you could eliminate the current problem but increasing office and retail space at the corner of Miami and Hosbrook will certainly make the situation much worse. Without sidewalks for pedestrians, there is no option but to walk in the street. It is very precarious. At rush hour it can be quite dangerous just pulling out of the driveway and off the street.
Cincinnati		
Madeira

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Cincinnati		My greatest concern is speeding. I don't live in the immediate area, but whenever I am on Hosbrook, I'm almost run over for driving 25. I've had aggressive drivers honk and pass me. It's ridiculous.
Cincinnati	I think a 30 mile per hour speed, enforced, would be better than the 25 miles currently ignored.	An increase in traffic due to congestion at the Montgomery Rd corner could cause a lot of cars to drive down Hosbrook. Already frustrated, the people will speed more than they currently do. This will be dangerous for walkers (me) and for animals crossing the road. Widening Hosbrook will be expensive, since there are poles on both sides. I would not want all of the widening on one side to cut cost, thus reducing my front yard significantly and putting traffic on my doorstep. Please - no street lights. That would just increase traffic speed, to say nothing of lights in the windows at night.
Cincinnati	Sidewalks on Hosbrook would be ideal.	Concern with new development and making sure traffic flow is adequate. Ideally is to flow traffic north on Hosbrook to Montgomery Rd. and have a wider intersection with better timing on traffic lights.
Madeira	Sidewalks and Traffic Calming measures.	Children and pedestrians accessing the swim club on lynfield via Hosbrook road.
Madeira	No comment.	Safety of the children; safety for all pedestrians.
Madeira	I see no problems at this time.	My street is fine. I see no problems on Hosbrook.
Cincinnati	Bike path/Sidewalk with a curb would be nice on Hosbrook. S Timberlane is rather narrow and sidewalks would be nice to get people out of the street.	People walking in the street.
Cincinnati	I would like Hosbrook to have sidewalks and a bike path. If both are not feasible and a sufficiently wide bike path (wider than Euclid) can not be built along Hosbrook I would rather have sidewalks built to serve both pedestrians and bike riders.	As someone who rides a bike frequently in the area, my greatest concern is the way the bike path on Euclid narrows down severely at the intersection of Hosbrook. My second greatest concern is that the speed limit along Hosbrook is unrealistically low for such an important traffic corridor. The congestion on this road is not a problem, but the speed limit is very difficult to comply with along this length of road. Finally, I feel the bike paths along Euclid should be wider.
Cincinnati	sidewalks, speeding	Madeira must be involved in any improvements, no traffic discharge into Kenwood Meadows

		Do you find it difficult to make left turn movements onto side streets from Hosbrook Road?	Do you find it difficult to make left turn movements onto Hosbrook Road from side streets?		Not only is it difficult to make left turns, it is almost impossible to get our motorhome safely in and out of the driveway without almost getting hit by someone. Visibility is also a problem in the spring and summer because of the trees, bushes, and weeds by Lynnfield. The amount of traffic on the street makes turning left almost impossible at times.	Same response as above.

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Cincinnati Cincinnati	Speed bumps would help on my street as would making it a non-thru street, many residents of Indian Hill who live on Clippinger and other side streets use my street as a short-cut and they speed as well. Hosbrook needs sidewalks and if the last curve was straightened out a bit, that would be helpful. It is the curve before you approach the retail on Montgomery Road. Additionally, cars turning onto Hosbrook out of the parking garage right after the curve cause a lot of hazardous situations.	Speeding on my street is my greatest concern. It is also hilly and there are many, many children. Youthful drivers just don't pay heed to the children or the speed limit and there are many youthful drivers. Hosbrook and the last curve before the retail is my greatest concern. That parking garage causes problems no matter what direction you're traveling on Hosbrook. The drivers who leave that parking area are not careful and are usually taking chances pulling out onto Hosbrook because they're frustrated with the wait to get out. I would like to add that the bike traffic on Shawnee Run and Miami causes problems year round, especially on weekends. They don't use the sidewalks and they hog the road on Shawnee Run and Miami, slowing down weekend traffic. They travel in packs with little regard to the 4-wheel traffic. Increased traffic on Hosbrook Rd. would create problems gaining access to it.
Cincinnati Cincinnati	We have laughed over the years and said that speed bumps would slow down the traffic, but several stop signs at the side streets might be effective.	My biggest concerns are speeding and congestion. There are many kids who walk along Hosbrook on a daily basis, also people walking, walking their dogs, and joggers. Over the years I have seen many near misses, several accidents, and was "grazed" by a speeding car myself as a child. Speeding and congestion has continued to be a problem and is only getting worse. Once again, thank you for looking into this issue and hopefully addressing the problem. Jayna Wilson 7590 Hosbrook Road Cincinnati, Oh 45243 513-891-7595
Madeira Sycamore Township Madeira	I do not see any problems with S Timberlane. I would like to have it left alone. Hosbrook needs either a bike path OR sidewalk on ONE side of the street. There is no way to safely walk/bike on Hosbrook at this time.	I do not have any current concerns about S Timberlane. Hosbrook needs to be safer and that means limiting traffic and enforcing the speed limit. This will be a bigger concern with the developments on Montgomery. Designs should include maintaining Hosbrook for local traffic and encouraging traffic from new developments to use Montgomery. Hosbrook should NEVER be widened for auto traffic, only made safer for pedestrians with a sidewalk/bike path. If traffic increases on Hosbrook stop signs should be added at Miami Hills to slow it down and give local traffic an opportunity to make safe turns.
Madeira MADERIA	I do not see a need. Enforce the speed limit and it will be very satisfactory to me.	DO not have one other than folks speeding. So if it isn't broke, don't fix it.

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Madeira Cincinnati	I'm perfectly happy with the way things are now. I live on a corner and as such, it's busy sometimes but nothing to cause concern for more safety.	
Cincinnati	A bike lane and side walks on Hosbrook, and bike lane on my street, and the speeding was awful. Several times when I slowed down to make a left into our driveway, a motorist passed me on my left as I was making my turn. Luckily I had quick reflexes to slam on my brakes to avoid an accident. We had a long back up out of my garage because someone was flying off of Hosbrook to use our driveway as a turn around. I noticed the police several times and they were just as concerned as we were but could not give me any workable solutions. I unfortunately did not record any license plate numbers because of the shock of the current situation. I did offer my driveway to the police which they did accept. A lot of frustration occurred with two different jurisdictions governing Hosbrook Road. We were repeatedly told by the police that motorists would not be stopped for speeding unless they were going at least 10 miles over the speed limit. Years ago, a child was killed on Hosbrook but the 25 mile speed limit was posted but not enforced.	I think if we make Hosbrook much bigger, with street lights and such you will love the neighborhood feel. Our greatest concern on Madeira Hills Drive is speeding as was the concern when we lived on Hosbrook Road. There is however, much less traffic on Madeira Hills Drive. The police periodically were visible but sometimes I felt it was more because of the sexual predator that use to live next door to us. Repeatedly, motorists do not stop at the stop sign at Greylock. There are many more children in our current neighborhood. We have had one major wreck in our front yard with a car hill hopping at 3:30 on a school day and wrapped their vehicle around our basketball post. Luckily no one was critically hurt, but the car was totaled that was taken without permission. It also shocked us to see this young man who lived in Madeira obtain a license shortly after this accident. At the time of the accident he drove a car without the owner's permission, without a license, and drove the vehicle at a high rate of speed. I never could figure this one out. Can you???
Madeira	Enforce stop signs	young speeders cutting through
Cincinnati	Traffic needs to be directed out to Montgomery Road in a more efficient way so people are not encouraged to cut through the subdivision to avoid the congestion on Hosbrook.	As congestion on Hosbrook increases because of the planned development at the corner of Montgomery & Hosbrook, more people will be cutting through Kenwood Meadows to avoid the congestion on Hosbrook.
Madeira	I think the biggest thing you could do to improve safety and a community feel would be to add sidewalks!!!! I feel that Hosbrook could be closed for improvements there are alternate routes one could take - I feel it would be difficult to close Euclid so maybe small portions at a time, but to still get it done in an efficient manner that does not drag on for a long period of time.	NO SIDEWALKS
Cincinnati	Study the options for future development impacting on Kenwood Meadows area. Evaluate various factors, including but not solely traffic, that would be affected by those development options. Create a strategic plan to result in the optimum development from the standpoint of the existing KM residential area.	I'm concerned that the character of my street and the Hosbrook area will be negatively changed as a result of developments that just "happen" in the absence of a strategic plan for the area.
Madeira	Reduce speeding	See #14
Madeira	More police monitoring of speeding vehicles	Speeding--danger to children Q 10? We have bike lanes on Dawson--no answer is correct.
Madeira	a traffic light at hosbrook and shewango and eventual widening of hosbrook	as noted above

Appendix B – Sycamore Township, Ohio Speed Study Results

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Madeira Cinci	I would like to see better speed control on Shawnee Run east of Miami Ave., especially truck traffic. I think we do a poor job of controlling trucks speeding on Miami Ave. between Euclid and Shawnee Run Rd.	Trucks Speeding through Madeira. I'd like to be able to ride my bike on Miami Ave. and other Madeira street using safe bike paths. Currently, most, if not all Madeira streets are too narrow to handle the traffic and provide adequate, safe bike areas. I am not aware of any, properly designed or marked bike lanes on city streets in our community.
Madeira Cincinnati	Tear down the houses on hosbrook, install a green belt with sound barriers along the expressway, add toll booths, add speed humps.	death curve needs straightened out and the low spot where it stinks of sewer gases needs filled in if sidewalks and bike trails installed they should be on the sycamore side. I think present bike path on Kenwood Rd is dangerous.
Cincinnati	Hosbrook should be widened - the road itself and a bike lane added as well as a sidewalk off the road. There is a section with quite a drop off with no shoulder. Additionally, the intersection on Euclid at Hosbrook needs to be widened - it's often suicidal to try to turn left with the oncoming traffic on Euclid.	The traffic currently is not bad but additional load will be a big problem. These are all residential streets - our street has a lot of young kids. Hosbrook is already congested and more construction will add to this. Sidewalks would make the area walkable to Kenwood area.
Cincinnati	Sidewalks and bike facilities ahould link all Madeira neighborhoods with downtown	
Cincinnati	some way to slow down the traffic, by speed humps or by designating it as a speed trap	Safety of my family, noise, property value; being able to walk/ride bike on hosbrook would greatly enhance the quality of life, and knowing that the speed is being closely monitored.
Cincinnati	Police monitoring traffic for speed limit compliance and complete stops at stop signs.	Speeding and running stop signs
Madeira	Speed humps and/or stricter enforcement of speed limits. If only the police would monitor my street half as much as Hosbrook, perhaps the speeding would be reduced.	
Cincinnati	Hosbrook needs sidewalks and decreased traffic volume.	
Cincinnati Kenwood	Perhaps speed bumps on Lynnefield outside of the swim club. Several speeders there and lots of kids playing out by the street.	Speed on Lynnefield and congestion on Hosbrook.
Cincinnati	sidewalks on Euclid, from Kenwood to Miami	

Appendix B – Sycamore Township, Ohio Speed Study Results

Is speeding a problem on your current street or residence?						If Yes, please rate the severity of the problem.	Is congestion a problem on Hosbrook Road?	If Yes, please rate the severity of the problem.	If Yes, please rate the severity of the problem.
Madeira	OH	45243	No			I don't know		I typically travel Hosbrook during non-peak hours and don't experience any congestion at those times.	
MADEIRA	OH	45243	Yes	Small Problem	No				N/A
Cincinnati	OH	45243	Yes		No			Take this road daily, have never seen congestion as a problem.	
cinti	OH	45243	Yes	Problem	Yes	traffic lights back up			Problem
Cincinnati	OH	45243	Yes		Yes	Yes, traffic backed up turning left onto Montgomery Road. This backs up also makes it difficult to exit south on Hosbrook from the Jalapeno's shopping/eating area.		The lights at Montgomery and Hosbrook are not timed well. Anyone turning on Hosbrook and turning left into the camera lot causes a gridlock problem	Problem
Madeira	OH	45243	Yes	Problem	Yes	During morning and afternoon rush periods it is next to impossible to back out of your driveway without a near miss. During the Xmas period traffic is unbearable. I have been here for 26 years and it is now so bad we are thinking of leaving.			
Kenwood	OH	45243	Yes	Severe Problem	Yes	When I making a right turn onto Hosbrook from Montgomery, traffic is backup up. People want to turn left into Ritz or Jalapeno's. Often, cars are trying to turn left out of the Duke building and can't see oncoming traffic. I am always very cautious in that area.			Severe Problem
Cincinnati	OH	45243	Yes		Yes				
Madeira	OH	45243	No		No				
Cincinnati	OH	45243	No		Yes				
Madeira	OH	45243	Yes			Congestion is a problem more so as you approach the light at Montgomery (Ritz Camera) vs the light at Euclid. MUCH of this congestion is caused by the "short" entry into the parking lot between Ritz and Jalapeno's - MANY people who turn right on to Hosbrook stop and try to make this left-hand turn, resulting in drivers attempting to BACK-UP on Hosbrook to make room for them to enter...this "entrance" needs to be made an "exit only" and all entry should be at the next driveway below the Jalapeno's.			

Appendix B – Sycamore Township, Ohio Speed Study Results

			Do you find it difficult to make left turn movements onto side streets from Hosbrook Road?	Do you find it difficult to make left turn movements onto Hosbrook Road from side streets?	
Madeira	I don't know		I typically only make right turn movements on to side streets when I travel Hosbrook. I don't have any recollection of being held up by a vehicle in front of me waiting to make a left turn onto a side street.	There is sometimes an occasional wait, but nothing I wouldn't expect making a left turn from a stop onto a through street.	
MADEIRA	No		No	No	
Cincinnati	No		No	No	
Cinti	Yes		going into camera store and fridays shopping plaza	yes coming out of Duke building and also out of fridays shopping plaza.	
Cincinnati	No		No	No	
Madeira	No		Yes	4 to 6 pm	
Kenwood	Yes		Do to the volume and speed of cars and trucks it is sometimes hard to turn. I have witnessed a number of accidents at Miami Hills Dr. and Hosbrook Rd. personally.	Yes	Same as above.
Cincinnati	Yes		Coming down Lynfield is always an experience. There is a slight hill on Hosbrook and I am always careful when making that turn. Cars like to speed in that area.	No	Same as above. Speeding cars!
Madeira	No			Yes	Worst from Bank One Towers
Cincinnati	No			No	
Madeira	No		Not usually, but I am often traveling earlier than rush-hour or later than msh-hour.	Yes	This is more often the case- especially during morning rush-hour... there are also a high number of drivers who "cut-through" Miami Hills to get to Miami so they can make a right on Miami and avoid the left at Hosbrook & Euclid. THIS IS MY BIGGEST BEEF - WE NEED SPEED BUMPS to discourage these commuters from using Miami Hills as an alternate Auto-Bon from using Miami Hills

Appendix B – Sycamore Township, Ohio Speed Study Results

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Madeira	on-street parking is not sufficiently restricted at intersections, allowing people to park all the way to the corner or in the case of a three way intersection, allowed to park within the intersection along the through leg of the intersection. This causes problems with narrow streets in my neighborhood where on-street parking allows for only a single travelled lane of traffic.	To much traffic and people not paying attention to what they are doing when driving!
MADEIRA	sidewalks. I'm a walker and have to get off the road when cars drive by kids don't have a way to walk or ride their bikes up the street safely. I'm not afraid of taxes having to pay for these. Can we put this on a voting ballot?	Greatest concern - speeding. Cars travel well above speed limit of 35.
Cincinnati	Euclid Rd has to much traffic. We do not need more traffic on this road! to many people talking on cell phones while driving. PEOPLE NOT PAYING ATTENTION TO THERE SPEED WHILE DRIVING AND TALKING ON CELLS. Not safe to walk on Euclid although many people do walk to get to Madeira and the Mall. Many times I've motions cars to slow down while I'm walking.	Our greatest concern is the speed of traffic on Tiki and the increase of traffic due to the development at Hosbrook and Montgomery.
Cincinnati	I would like to see speed humps on Tiki to slow down cut-through traffic.	In the morning and from 4 to 8 pm the traffic is too heavy for a residential area. If any new buildings are to be constructed, access should be limited to Montgomery Rd
Madeira	Less access to Hosbrook from the surrounding office buildings	Volume and speed are completely ignored on Hosbrook. Someone will eventually be killed trying to exit their drive. My greatest concern is that nothing will be done. No one cares!
Cincinnati Madeira Cincinnati	I would like to see stop signs installed at all side streets connecting to Hosbrook Rd. I would like to see the 25MPH limit ENFORCED. I would like to see a cruiser more than once a month	Control the speed!!!!!!
Madeira	We NEED the wide-arched speed-bumps (See Minot Ave in Oakley for reference of this type of speed bump) installed on Miami Hills and also on Shewango -- we have so many young children living on these streets and too many commuters use these as through-ways, driving at excessive rates- over 50 MPH... PLEASE address this issue before a child is seriously injured or killed, given the additional traffic flow, it's just a matter of time before we have a tragedy.	Speed!!!!!!
Madeira	I would like the wide-arched speed-bumps (See Minot Ave in Oakley for reference of this type of speed bump) installed on Miami Hills and also on Shewango -- we have so many young children living on these streets and too many commuters use these as through-ways, driving at excessive rates- over 50 MPH... PLEASE address this issue before a child is seriously injured or killed, given the additional traffic flow, it's just a matter of time before we have a tragedy.

			Is speeding a problem on your current street or residence?	If Yes, please rate the severity of the problem.	Is congestion a problem on Hosbrook Road?	If Yes, please rate the severity of the problem.	
Cincinnati	OH	45243	Yes	Severe Problem	Yes	The traffic congestion makes it difficult to safely enter and exit the driveway of our home.	Severe Problem
Cincinnati	OH	45243	Yes	Severe Problem	Yes	Frequently too much traffic (and moving too fast) to be able to back out of driveways, especially during rush hour.	
Cincinnati	OH	45243	Yes	Problem	Yes	At traffic light at Montgomery Rd. with left turn, right turn and through traffic on Hosbrook. Also traffic pulling out of Bank One building and shopping area. Also, wait at Hosbrook and Euclid, on several occasions, had to wait through two green lights to turn left.	Problem
Cincinnati	OH	45243	No	Yes	No	There are more cars than the lanes can handle and sometimes it is hard to get out from Lynnfield on to Hosbrook. Also, frequently use Hosbrook from Euclid for access to 71 North, but it's a straight through shot, no issues	
Madeira	OH	45243	No	Yes	Yes	Too many curb cuts - site distance poor	Severe Problem
Cincinnati	OH	45243	Yes	No	No	A lot of people tend to drive faster than the speed limit on Hosbrook.	Small Problem
Cincinnati	OH	45243	No	Yes	Yes	I've never see Hosbrook really congested to date.	Problem
Cincinnati	OH	45243	No	N/A	No	Takes a while to get in and out of driveway especially during high traffic times	N/A

Appendix B – Sycamore Township, Ohio Speed Study Results

		Do you find it difficult to make left turn movements onto side streets from Hosbrook Road?	Do you find it difficult to make left turn movements onto Hosbrook Road from side streets?	
Cincinnati	Yes	The long waits to turn left cause traffic to back-up in other lane, and more congestion along the road.	Again, long waits during rush hour, and excessive speeds make it difficult all day. The high spot near Miami Hills blocks the view enough so if you pull out when it looks clear, someone travelling 35+ mph comes up on you awful quick.	The visibility is low and the speeding cars make it hard to safely get on to Hosbrook in either direction.
Cincinnati	No	Usually never more than a 3-5 car wait.	Yes	Yes
Cincinnati	Yes	see above	It is a problem turning on to Hosbrook from Montgomery Rd. because of left turns into Ritz Camera and the Mexican Restaurant.	Turning left from Miami Hills on to Hosbrook
Cincinnati	Yes		Yes	It is difficult at times to turn left from Lynnfield to Hosbrook
Cincinnati	No		No	Do it somewhat infrequently, but never an issue for me
Madeira	Yes		Turning left onto Shewango Way from Hosbrook is dangerous - traffic comes over the hill and visibility is poor. Turning into and out of the Camera store, Jalapenos, the Galleria, the apartments on the east side and people coming out of the office building driveways on the other side - turning right onto Hosbrook from Montgomery and having to stop short if someone is turning into those places, all make it dangerous	Yes
Cincinnati	No	I haven't had problems turning left on side streets	No	Same reasons as listed above
Cincinnati	Yes	not too terrible just depends on the time of day.	Yes	There are usually cars but only a few. Nothing to complain about.
Cincinnati	No		No

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Cincinnati	Sidewalks, bike path and traffic round-abouts. The lighting is not the problem, the traffic is	The traffic disturbs our quality of life and safety of our family and pets. Further, I feel Hosbrook Road is an opportunity to showcase Sycamore Township as a great place to live, work and shop, it should absolutely have sidewalks.
Cincinnati	I would like to see sidewalks and bike lanes most of all. Currently, here is no good way to bike/walk down Hosbrook, so access to the shopping at the end of the street is safe only via car. Next safety issue is the excessive speeds - perhaps removing the painted center line and adding roundabouts at Miami Hills and Loahnes would help cut down speed - the roundabouts with an emergency lane through the middle since there are frequently fire trucks/Madeira cops. I think, though, that adding sidewalks and bike lanes would help slow people down also. What is needed is a safe bike/pedestrian passageway from Kenwood Meadows and Madeira up to the shopping areas.	Safety of pedestrians and cyclists (including plenty of kids) is the biggest concern. The cars frequently move too fast, and road is too narrow to allow everyone to use it safely. There is so much through traffic in Kenwood Meadows and I live at the west end of Miami Hills where it deadends. So many cars disregard the no outlet sign which necessitates them having to turn around. In the last few years new people have moved in to this area and they and their guests seem to disregard the no parking sign so therefore, our driveway is being used as a turn around. We had a new driveway installed last year which was very expensive and we certainly did not do so for it to be used as a turn around.
Cincinnati	No through traffic in Kenwood Meadows and enforce it.	Our street is a cul-de-sac so have no problems with our street but concerned with Hosbrook Rd.
Cincinnati	I would like to see trimming kept up on bushes that can sometimes block the view getting out of Lynnfield on to Hosbrook. If the cars are going too fast it is hard to see far enough to judge speed.	I have none
Madeira	Fewer curb cuts near the intersection of Montgomery Road	Too many curb cuts near the intersection of Montgomery Road
Cincinnati	A lot of people walk on Hosbrook road. Side walks would be a lot safer for their walk.	Speeding as well as people walking and riding bikes along Hosbrook, especially at the bend where you don't see them until you've completed the bend, they need side walks and bike paths for safety. Children playing in the middle of Lynnfield Drive.
Cincinnati	Sidewalk along Hosbrook would allow our sons to ride their bike to get food at Penn Station & Chipotle.	It is difficult to turn left onto Montgomery Rd from Hosbrook. More development is only going to add to that

Appendix B – Sycamore Township, Ohio Speed Study Results

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Read.
Cincinnati	Do not add sidewalks or bike paths to a street that is already congested and a haven for speeders. Why would you even consider taking steps to increase traffic whether pedestrian or bikes to a targeted problem area.	We do not need to encourage any more traffic whether vehicular, pedestrian, or bikers by building sidewalks or bike paths. People already sail through the area disregarding stop signs and using the streets as a circular drag strip and raceway. Making it more accessible will increase the problems that we already have with high school event traffic and parking. Adding bike paths and sidewalks will narrow the streets and further congest and increase traffic to already overused areas.
Madeira	decrease number of speeding cars and trucks	speeding is a concern on both streets. sometimes when going the speed limit of 25 mph, there is a back up of traffic. Traffic does not seem to observe the speed limit.
Cincinnati	The biggest safety issue is the lack of sidewalks. Small children are too close to traffic and women push babies in strollers on the busy streets of Madeira with limited sight distance for the drivers.	The lack of sidewalks to keep pedestrians away from traffic.
Cincinnati	Incorporate traffic calming measures on Hosbrook. Install 3 more street lights on Hosbrook. Enforce speed limit on Hosbrook, though 30 MPH seems reasonable	Greatly increased traffic resulting from the proposed P&P proposal will adversely impact both Kenwood Meadows & Madeira by heightening danger to pedestrians, cyclists, motorists, joggers. The increased traffic will result in a degradation of the residential character of our Kenwood Meadows Neighborhood. Hosbrook Rd could easily become dangerous, noisy, and resemble a commercial thoroughfare. We are fearful that zoning could change and our street could be invaded by commercial interests. The death of a lovely neighborhood!
cincinnati	sidewalks. My other concern is the light on Shewango and Miami . People rather disregard the red light and shoot through it like it isn't even there. I make sure that I dont pull out to quickly onto Miami Ave.	we just feel that sidewalks would be very beneficial for anyone to walk up to mall area. We would encourage walking over driving if possible.
Madeira	Hosbrook needs a light in the middle and the speed raised to 35 with bike paths and sidewalks on both sides. The houses are so far away from the street that it is only a speed trap for the community!	Southside and Laurel need stop signs in the middle, the traffic is faster than on Hosbrook and there really are children on Southside and Laurel with homes close to the road and none on Hosbrook.
Cincinnati	less cars , go slower and add sidewalk or bikepath or both... add a stop sign at Miami Hills & Hosbrook. We are seeing more and more foot traffic on Hosbrook Rd side walk would make the streets a lot safer.	additional cars and the safety of my family... we have 6 grand children under the age of 11 who visit often and 4 of these grandbabies live in Madeira. One afternoon I saw 6 young girls walking on the Kenwood side of the street, I saw 2 young boys on skate boards in the middle of Hosbrook. I saw one boy on a scooter in the street 4 joggers, a couple walking and 5 kids walking through my yard from the Ming's streets going to the Kenwoods swim club. I saw all this in a 30 minute period while cutting the grass in my front yard.
Cincinnati	Speed Bumps on my street	Hosbrook and Montgomery intersection is dangerous and most of the time very congested. It is also a rather steep incline and during snow, often times many cars can't negotiate the hill and cause even more congestion. Reconstruct the slope to a milder incline might and widening the intersection might reduce this dangerous situation
Madeira	Widen with sidewalk on Hosbrook	Excessive speed on my street, Increase Street, widen to accomodate volume, put in sidewalk on Hosbrook
Madeira	It would help to have more police patrols. If sidewalks were installed on Hosbrook it may increase crime because people from Montgomery Road area would have easy access.	People tend to not stop at the stop signs in the neighborhood and go too fast.

Appendix B – Sycamore Township, Ohio Speed Study Results

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Madeira	Sidewalks would help on my current street. Hosbrook Road seems fine the way it is.	Not really any great concerns over either street.
Madeira	bike paths sidewalks and the widening of hosbrook	answer above
Cincinnati	there should be a traffic light either on the Shewango/Hosbrook corner or the Miami hills intersection.	Nothing will happen
	I would be in favor of prohibiting on-street parking on Shewango between the top of North Mingo and Hosbrook. The mail truck should not park there, nor should anyone else. And during a.m. and p.m. rush hours, prohibiting on-street parking anywhere along Shewango would be a smart move. When there are three or four cars parked on my street during busy traffic times, motorists have to constantly go left or center to get around parked cars, all this weaving is not safe for pedestrians or for on-coming traffic. Residents on Shewango have garages and driveways that can accommodate several vehicles. Allowing people to park on Shewango during rush hour is exacerbating any problems arising from development projects along Hosbrook Rd.	The biggest safety issue for my family on Shewango Road is at the Miami Ave. end of Shewango. As a.m. pedestrians crossing Miami Ave. in the crosswalk and with the light, we have watched Miami Ave. traffic travel through that intersection well after their side of the intersection, my family and I have nearly been hit on several occasions by motorists who have waited on Shewango to turn left onto Miami Ave. When they get a green light, pedestrians also get a "walk" signal, and not all motorists yield to those of us in the crosswalk. Hanging a yellow "yield to Pedestrian" sign next to the traffic signal might remind motorists that pedestrians get to go first, and having a red-light camera perched on top of that traffic signal would be a wonderful investment in pedestrian safety, as long as there is a sign warning motorists that a red-light camera is in use up ahead. Shewango is always busy during rush hours since it connects Miami with Hosbrook. Sidewalks and bikeways and crosswalks might help make it safer, but the biggest danger for my family during the 10 years we have lived on Shewango is motorists who ignore red lights and disregard pedestrians.
Cincinnati	No changes.	No concerns at this time.
Madeira	my street (mar del) seems fine w/o sidewalks, but I think that the timberlanes and mimosas would benefit from them! I see lots of little children racing across the street in those areas and worry about safety	same as above, and although I probably wouldn't use sidewalks on Hosbrook, I think it would help with safety issues on that street
Madeira	MINIMIZE TRAFFIC TO WHAT EVER DEGREE REASONABLE IN ORDER TO MAINTAIN RESIDENTIAL ATMOSPHERE	INCREASING TRAFFIC IMPACT ON RESIDENTIAL COMMUNITY - SAFETY
Cincinnati	enforce the speed limit	speed limit is not enforced anywhere in Madeira.
Cincinnati		

Appendix B – Sycamore Township, Ohio Speed Study Results

			Is speeding a problem on your current street or residence?	If Yes, please rate the severity of the problem.	Is congestion a problem on Hosbrook Road?	If Yes, please rate the severity of the problem.	If Yes, please rate the severity of the problem.
Cincinnati	OH	45243	No	N/A	No	I use it all the time to get to I-71. Always make it thru the light at Montgomery on the first try. 25 MPH limit, with speed traps, is a little extreme - compared to other streets which are primary arteries (Kenwood, Euclid, etc.)	N/A
Madeira	OH	45243	No	No			
Cincinnati	OH	45243	Yes	Small Problem	Yes	Because their is a increase in businesses now and coming soon along Hosbrook we have the congestion problem and it is going to get worse. I see also people walking along Hosbrook even in the residential areas where their are no sidewalks.	Problem
Cincinnati	OH	45236	No	Small Problem	Yes	Only at certain times of the day and primarily at each end of Hosbrook	Problem
Cincinnati	OH	45243	No		Yes	Sometimes during rush hour when trying to turn into Duke or into/out of restaurant/shopping area on the other side (Penn Station, Jalapenos, etc.)	Problem
Cincinnati	OH	45243	Yes	Problem	Yes	but mainly at the intersection of Montgomery and Hosbrook after 4 p.m. when business let out and people want to visit the stores in the complex area.	
Cincinnati	OH	45243	Yes	Problem	Yes	Most of the congestion I notice is near the intersection of Hosbrook & Montgomery. When going towards Montgomery on Hosbrook, there's sometimes not enough room to get past someone turning left into the radio stations. Also, the traffic tends to back up for making a left onto Montgomery.	
Madeira	OH	45243	Yes		No	The main congestion occurs occasionally at the traffic lights at intersections (Euclid and Montgomery roads) around the rush hours.	Small Problem
Cincinnati	OH	45243	Yes	Problem	Yes	Other than those two intersections, congestion is not typically a problem.	Problem
						traffic lights cycle too short for hosbrook to montgomery.	

Appendix B – Sycamore Township, Ohio Speed Study Results

			Do you find it difficult to make left turn movements onto side streets from Hosbrook Road?	Do you find it difficult to make left turn movements onto Hosbrook Road from side streets?
Cincinnati	I don't know			I don't know
Madeira	Yes	This is particularly true if you are trying to go left onto Montgomery Road. Many people in Madeira are trying to avoid traffic by the shopping center and often take Hosbrook to get onto I-71 North.		Not side streets! I find it difficult to make a left onto Hosbrook from Euclid Ave.
Cincinnati	Yes	I have seen sometimes drivers do have long delays including myself in wanting to turn left on to the side streets. This is mainly during the rush hour traffic morning and night.		For the same reasons listed in box #5. Again mainly during the rush hour traffic morning and night.
Cincinnati	No			Again, only at certain times of the day.
Cincinnati	No			No
Cincinnati	No			No
Cincinnati	No		I don't normally make left turns onto side streets from Hosbrook.	No
Madeira	No	Usually, left turns are not a problem.		The speed limit is currently 25 mph. Most drivers travel faster (35-40 mph) than the posted speed limit. It is difficult at times to determine how fast the drivers in each direction are travelling.
Cincinnati	No			No

Appendix B – Sycamore Township, Ohio Speed Study Results

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Cincinnati	I have concern about the number of people who walk Kenwood Rd. A real chance for being hit by someone who is distracted while driving.	
Madeira	Hosbrook is just becoming more congested all the time. I don't see much of a solution except widening the road and changing the traffic patterns with better timed lights and possibly another entrance to Montgomery.	
Cincinnati	I believe left turn lanes would help for the side streets. Also because Miami Hills Drive and Hosbrook is a main intersection possibly put a yellow flashing light at that intersection.	I want to keep my street the way it is. I feel that you need to address the main road (Hosbrook Rd) because it will be getting most of the traffic build up.
Cincinnati	I would like to see Hosbrook widened at the Montgomery end to facilitate traffic flow in and out of the businesses at that end and to reduce the backup at Montgomery. I would also like to see the Euclid/Hosbrook intersection improved - widened on Hosbrook and Euclid.	Our street is in dire need of new curbs and resurfacing. The curbs are crumbling and we have some extreme dips and other road issues especially around manholes in the street.
Cincinnati	Well, Hosbrook doesn't affect my street, but people roll through or run the stop sign at the corner of Springcrest and Juniperview all the time. I rarely see police monitoring adherence to the sign.	See above
Cincinnati	some how slow cars down and also when turning from Montgomery Road and turning Right onto Hosbrook it is dangerous because it backs up with people wanting to turn left into Ritz Camera or the Mexican restaurant...close calls on reentering.	no safety walking and speed...turning from Hosbrook and making a right turn into the Hosbrook Apt Complex people are on my bumper because I go 25 and they get angry!!!!
Cincinnati	I would like to see street lights - our street is very dark at night with no lights.	my greatest concern!!! shadows where there are some numerous children are walking, the lack of sidewalks, it makes it nearly impossible for smaller children to ride bikes or walk safely in the neighborhood. The amount of traffic already using Miami Hills as a through street and the speeding make it unsafe to walk. Also, the street is not very wide and when there are cars parked on the street, traffic does not always yield (i.e. pull over) for traffic coming in the opposite direction. It can especially be difficult if a truck or van is parked on the upper part of the hill to see oncoming traffic with the bend in the road. As far as Hosbrook is concerned, my greatest concern is that a majority of traffic drive faster than the posted limit of 25 mph. Most of the time while driving on Hosbrook, I have someone following behind too closely. With a dramatic increase in traffic, I can see problems turning left on Hosbrook from Miami Hills, especially if traffic backs up at the traffic light at Euclid. Another problem area on Hosbrook is the hidden driveway coming out of the parking garage for the office tower and cars pulling out too far into the road to fast you are travelling might be beneficial as well.
Madeira	more and more pedestrians are walking along hosbrook and sidewalks would help their safety

		Do you find it difficult to make left turn movements onto side streets from Hosbrook Road?	Do you find it difficult to make left turn movements onto side streets from Hosbrook Road from side streets?	
Madeira	No	Don't make turns onto side streets. I use Euclid or Montgomery to access areas.	Don't make turns off of side streets. Again turning onto Hosbrook there is a light at either Euclid or Montgomery that controls the traffic.	
Madiera	No	I turn left from Hosbrook onto Miami Hills multiple times every day and it is never a problem. I do have to pay attention to oncoming traffic, of course, but it isn't a problem.	I don't know	I do this very seldom.
Cincinnati	No	I drive Hosbrook on a regular basis, and I have had no difficulty turning onto side streets.	Yes	The closer one is to Montgomery, the more difficult it is to turn onto Hosbrook. This is particularly true when turning from the shopping center at the corner of Montgomery and Hosbrook

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Madeira	I think the current situation is fine. I enjoy living in my home on Hosbrook Rd. as it currently is. A sidewalk may help and get people who walk on the shoulders off of the street.	It would be a great concern of mine if there was to be any type of lights or road widening on Hosbrook. It would definitely make me think about relocating. I don't hear the noise of the traffic with the current length of set back from the road and if that where to change, I would be highly disappointed. I hope these points are taken into consideration and keep the people informed. Thank you for giving me the opportunity to take the survey and have a voice.
Madiera	My current street is quiet and safe. Hosbrook is almost totally pedestrian unfriendly. We need to encourage people to walk more. I look at Miami Road and the number of walkers on the sidewalks there.	My concern for Hosbrook is the possibility of businesses creeping south along Hosbrook until it destroys the quality of living in the homes along Hosbrook.
Cincinnati		
Madeira	I have no problem with the current traffic situation on North Mingo Lane. I would like to see a sidewalk on Hosbrook. I would like to see the Hosbrook entrance to Ritz Camera closed and require that cars enter from slightly further down the road at the entrance to the strip mall. You can reach Ritz Camera from that entrance, but people don't know it and stop traffic at the entrance closer to the corner.	Personal safety while walking along Hosbrook with my dogs.
madeira	sidewalks for the kids. Hosbrook needs traffic flow control and get rid of the hidden driveway at the office bldgs.	Traffic

			Is speeding a problem on your current street of residence?	If Yes, please rate the severity of the problem.	Is congestion a problem on Hosbrook Road?	If Yes, please rate the severity of the problem.		If Yes, please rate the severity of the problem.
Madeira	OH	45243	No	Small Problem	No	Traffic flows well. In addition, the light from Hosbrook onto Montgomery Rd going south is adequately long for the number of cars waiting there.	N/A	
Cincinnati	OH	45227	No	N/A	No	I use Hosbrook at all times, day and night and I've never encountered a congestion problem.	N/A	
Cincinnati	OH	45236	No	No	No	Traffic seems to move along steadily on Hosbrook. I hardly ever encounter backups.		
Madeira	OH	45243						
Madera	OH	45243	Yes	Severe Problem	No	I do not see it as an issue. The traffic does not back up at the lights at Mont Road or Euclid. I would like to see a wider shoulder for bikes and foot traffic. There is no place for pedestrians and they should have equal rights as a car.	N/A	
Madera	OH	45243	Yes	Yes	No	When using Hosbrook to connect to I-71 north, I never have to wait for more than one light interval before being able to turn onto Montgomery Road (West). Thus I don't find this a problem, however I rarely am there during peak traffic hours.		
Cincinnati	OH	45243	Yes	Yes	No	There is a house on the corner of Hosbrook and Miami Hills that has orange daylilies on the property line of Hosbrook. They severely limit the view of oncoming traffic, therefore congestion on Miami Hills onto Hosbrook is congested.	Severe Problem	
Cincinnati	OH	45243	No	Small Problem	Yes	travel Hosbrook nearly everyday to get to I71 N. There is typically a lot more traffic in the early hours. I think the most congestion takes place around the stop light at Montgomery Rd.	Problem	
Cincinnati	OH	45243	Yes	Yes	Yes	At the Mtgy & Euclid ends during high traffic / rush hour times.	Problem	
Madera	OH	45243	Yes			mostly near Montgomery Road and during rush hour or during community events	Problem

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Madeira	The exits from the business offices is dangerous because the drivers can't see around the retaining walls. Also, there should be a turn lane to get into the building parking lots and the shopping plaza near the traffic light at Montgomery Road.	The drivers trying to exit the building parking garages near Montgomery Road, they often pull out blind and without enough clearance. This is not a problem of speed. Hosbrook is too narrow and too heavily traveled for walkers to use it safely. Sidewalks would be a great help.
Cincinnati	The exits from the business offices is dangerous because the drivers can't see around the retaining walls. Also, there should be a turn lane to get into the building parking lots and the shopping plaza near the traffic light at Montgomery Road.	Ben, I hope when all of this re-configuration around Madera goes on, there is ALWAYS cycleists in mind. We have a good start, but it could be much much safer. Here is what I see. bike lanes disappearing in favor of car right of ways. Hosbrook, Euclid and Kenwood for example. The bike lanes should be continuous or it gets scetchy. The Kenwood and Euclid bike lanes can be wider, the drain grates can cut the total path width to about 12 inches. There is plenty of width to decrease the car lanes by 12 inches both sides and it would make it much safer for pedestrians and bikers. Why is there no shoulder on Camargo? I know that is a State route by that road is extremely dangerous. That street is crazy. I run ride my bike a lot (Ironman training) and never feel like the City has done a good job of protecting bikers. I would be happy to stop down and give you the POV from a runner and bikers prospective on how the city can make the streets safer for non-vehicular traffic. Thanks!
Cincinnati	The exits from the business offices is dangerous because the drivers can't see around the retaining walls. Also, there should be a turn lane to get into the building parking lots and the shopping plaza near the traffic light at Montgomery Road.	Why do the bike lanes on Euclid disappear at Hosbrook? This is a huge issue for me when I ride my bike. It is very dangerous because cars run you off the road. Madera. There needs to be a better plan for bikes at that traffic light. It is very poorly done.
Madeira		The surface of our street (Lakota) is deteriorating and with the current economy, I don't expect any repairs in the near future. I think that the home owners on Hosbrook must not like the level of traffic, however since I don't live there I don't have a stake in this issue. When I travel on Hosbrook, I never exceed 27-28 MPH but I often have an impatient person behind me.
Cincinnati	None for my street (Lakota). Perhaps add another lane on Hosbrook down to the office building. Or prohibit left turn off of Hosbrook into the Friday's parking lot during peak traffic hours; customer could enter off of Montgomery Road.	Remove the daylilies on hosbrook!!!!
Cincinnati	Sidewalks would be a great addition. While our street is lucky to have them I've noticed a lot of other streets in the neighborhood.	Squirrels

			Is speeding a problem on your current street of residence?	If Yes, please rate the severity of the problem.	Is congestion a problem on Hosbrook Road?		If Yes, please rate the severity of the problem.
Madeira	OH	45243	Yes	Problem	No	I do not travel on Hosbrook during "rush" hours, but use Hosbrook to get to I-71 North and avoid the congested Montgomery Road.	
Cincinnati	OH	45243	No		No	I rarely use Hosbrook but when I do I don't feel like it is unusually congested for the time of day I am traveling.	
Madeira	OH	45243	Yes	Small Problem	No	When I do use Hosbrook (infrequently), it is to get south to Euclid off of Shewango or Miami Hills Drive. It is difficult to turn left off both these streets, and I prefer not to cut through this residential area anyway, so I don't use Hosbrook regularly. I don't think there is so much a "congestion" problem as that the cars on Hosbrook drive pretty quickly and are spaced out just enough to make turning difficult.	N/A
Madeira	OH	45243	No		No		
Cincinnati	OH	45243	Yes		I don't know	Near the intersection of Montgomery Road and Hosbrook to the residential area. Heading away from Montgomery Road the first parking lot entrance on the left is too close to Montgomery Road. To turn Left to Ritz Camera you have to cross the left turn lane to SB Montgomery Road. The remainder of the traffic from Montgomery Road does not have a very good sight distance turning to Hosbrook. The entrance on Hosbrook from the office towers. This entrance does not have good sight distance either direction. The wall on hill side on the Montgomery Road side of the entrance need to be modified to help correct the situation.	
Cincinnati	OH	45243	No		Yes	(Some wait exiting onto Montgomery or Euclid, but doesn't seem excessive.)	
Madeira	OH	45227	No		No		
Madeira	OH	45243					
Cincinnati	OH	45243	No	Small Problem	No	I have never experienced delays when travelling on Hosbrook Road.	Small Problem
Cincinnati	OH	45227	Yes	Small Problem	No	I frequent the area and used Hosbrook Road routinely. I have not noticed current congestion problems.	
Cincinnati	OH	45243					
Cincinnati	OH	45243	Yes		Yes	Long line at the light during rush hour and holiday season.	Problem

Appendix B – Sycamore Township, Ohio Speed Study Results

		Do you find it difficult to make left turn movements onto side streets from Hosbrook Road?			
Madeira	No	No	I don't know	I don't know	See above ... cars on Hosbrook generally are going pretty fast, and are spread out, rather than in clusters (in my experience), so it can be hard to find a large enough gap in the traffic.
Cincinnati	I don't know	I don't know	I don't know	No	
Madeira	I don't know	I don't know	I don't know	No	
Madeira	No	No	Yes	Yes	Yes, particularly during rush hour. Also, a left turn from Euclid onto Hosbrook is very dangerous. The lane is narrow and oncoming traffic from both west bound Euclid and cars turning right onto Euclid nine times out of ten crowd the left turn lane which makes it very dangerous. The other cars often get into the turn lane.
Cincinnati	No	Not really. But the sight distance for a left turn to Shewange has some to be desired.	I don't know	I don't know	
Madeira	I don't know	rarely do this	rarely do this	rarely do this	
Madeira	No	I haven't run into a problem here.	Yes	No	
Cincinnati	I don't know	I haven't run into a problem here.	Yes	No	
Cincinnati	No			No	
Cincinnati	No			No	
Cincinnati	No			No

Appendix B – Sycamore Township, Ohio Speed Study Results

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Madeira Cincinnati Madeira	I would feel more comfortable with sidewalks on our street, but if it would cause a large property tax increase, I can live with what we have. We are on a no outlet street and there is danger at times when the sun is setting and drivers have a difficult time seeing you when you are walking along the curb area. reflectorized center line and outside edges.	There are some younger drivers and street owners in minivans who drive too fast on our street. There is a deaf child and younger children living in the neighborhood and I would hate to see someone get hurt.
Cincinnati Madeira Madeira	Better speed control. Sidewalks for pedestrian traffic. A bike lane is a huge plus, as long as it is wide enough and is kept free of broken glass and other debris.	Safety for pedestrians and cyclists. Thanks for seeking our input!
Cincinnati Madeira Madeira	1) The entrance at Ritz make that a no left turn off Hosbrook.)The parking lots in that area are all connected but I don't know if there is legal access for everyone.) 2) The driveways for the offices on the south of Hosbrook make right turn in only. Have the exit on Montgomery Road at the traffic light. (Most of this traffic seems to be heading to Montgomery Road) 3) Speed and left turns on and off Hosbrook could be controlled with Stop signs.	Must the speed limit remain at 25 mph on Hosbrook. I try to maintain that speed but oftentimes I am taigeted by someone who prefers to drive faster.
Cincinnati Madeira Madeira	I would like to see the left turn lane from Euclid onto Hosbrook widened. It is dangerous as it is as I described above.	My biggest concern with hosbrook is that it will become a bottle neck with the increased traffic due to the proposed developments near Montgomery road.
Cincinnati cincinnati Hostbrook needs to be widened for turn lanes, especially at Euclid and Montgomery Roads.	Increased Police attention would be helpful in my neighborhood (Kenwood Hills) in order to address speeding issues. Hosbrook Road would benefit from widening or dividing the driving lanes as well as the addition of sidewalks and/or bike lanes.	Urban Active development is going to add a lot of additional traffic during rush hour. I was a member in Hyde Park, and it really added to congestion at Edwards exit roads.

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
cincinnati	Maybe this is off topic a little. Why do our police cruisers go 50-60 on Miami to respond to a 1-71 or other emergency. We may need radar for them	Crosswalk enforcement at Miami Hills and Miami would be great. Local legend Iona Weber could not cross the street as I stopped(I was heading north) and the opposing auto stopped, but the auto behind me used the parking lane to pass on my right. Did follow the auto after Iona crossed. Good thing she did or she would have been late to her service at Madeira-Silverwood Presb church.
Madeira	widen the street so there is a center turn lane	
MADEIRA	BUSHES ON SIDE STREETS LEADING INTO HOSBROOK NEED TO BE TRIMMED BACK FOR BETTER VISABILITY	NONE
Madeira	More lighting so people can see the dangerous curves as they head east on Shawnee Run	The one issue I have with Hosbrook is that traffic from Montgomery will head south on Hosbrook to cheat the light and try to turn into Fridays parking lot or the camera store's lot. There is usually a line of traffic already waiting on the light and they can not make it through so it holds everyone up trying to get down Hosbrook.
Madeira	Cincinnati Cincinnati madeira	On Shawnee Run we are currently getting sidewalks. I feel this will greatly increase the safety for pedestrians and will perhaps help create more contact among the neighbors. I would rather have sidewalks on Euclid Rd. It is dangerous to access downtown from our side of madeira. I think that would be better than sidewalks on Hosbrook.
Cincinnati	There are only partial sidewalks on Euclid; these should be completed/continued. I think Euclid has more traffic than Hosbrook	Noise on Euclid is a problem; there should be a "no engine brake" sign at Euclid and Thomas
Madeira	Better speed control and straighten out the curve towards Montgomery. Cars always cross the yellow line there.	Maybe if we put stop signs by Shewango and Miami Hills it would not become a thoroughfare.
Madeira	Enforce the speed limit on Hosbrook	Too much through traffic on Miami Hills Drive (people taking a short cut).
Cincinnati	Widen the street and watch for speeders	On our street there are no sidewalks and many people walk on this street. It is especially noticeable when the school bus lets children off and they walk to their homes. On Hosbrook, it is too narrow for people to walk on, but I don't see people ever walking on Hosbrook.
Cincinnati		Have not seen a problem on Hosbrook.

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Madeira	Many, many people walk their dogs, jog and ride bikes along Juler Ave. If you are on foot and headed for the business district, Juler is an alternative to Miami Ave. It's quieter and has significantly less car traffic. Where there are sidewalks (on Juler) pedestrians use them. It would be great to have sidewalks for the entire length of the street.	The lack of sidewalks make it very dangerous to walk along Hosbrook. I walk a fair distance out of my way to avoid it. A lot of people walk to places in this community and a sidewalk here would be appreciated by all.
Cincinnati

			Do you find it difficult to make left turn movements onto side streets from Hosbrook Road?	Do you find it difficult to make left turn movements onto Hosbrook Road from side streets?	Never that I am aware of.
Madeira	No	Cincinnati	The side streets are always accessible for left turns except as mentioned above ((Is congestion a problem on Hosbrook Road?)) It would be almost impossible to correct this problem and it does not happen that much since most people are nice enough to let them turn.	it can be difficult waiting to make a turn from side streets back onto Hosbrook traffic is often going fairly fast its me first you wait.. grr	
Madeira	No	Madeira	at times the traffic is sooo backed up there is no room to even think of being able to make a left turn safely unless you meet a kind person letting you turn.....	No	Difficult to turn onto Hosbrook delays most times.
Madeira	Yes	Cincinnati	Only at peak times	Yes	Greater at peak
Madeira	No	Madeira	Only at peak times	Yes	sometimes difficult to turn from Miami Hills due to traffic volume.
Madeira	Yes	Cincinnati	never wait more than a couple cars.	Yes	depends on time of day – at 5pm, very busy off hours, not bad.
Madeira	No	Madeira	Traffic doesn't seem heavy enough at the times I travel to make left turns difficult, although I don't make them myself.	I don't know	
Madeira	No	Madeira		No	
Cincinnati	No	Cincinnati	Not much traffic after you get past the commercial area	Yes	Turning left from Shewango onto Hosbrook can be a problem during certain times of the day. Also shrubbery/trees tend to block views of traffic heading towards Montgomery Rd.
Cincinnati	No			No

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Madeira Cincinnati	The streets in Madeira are safe. Some areas are not well lit BUT that adds to the character of our area. With low level lighting is easy one the eyes for driving down the roads while offering a measure of security. In Madeira we do not have to feel like we are under full mercury or sodium vapor harsh lights at every street	On Juker we are much better off without sidewalks. My wife and I walk our dog almost every evening and have absolutely no problem with using the street as a means of travel. The other part of Juker has sidewalks and I believe it detracts from the appearance of neighborhood. Many years ago the idea for sidewalks was floated about in my area and it was soundly defeated. One last note. Lets not ruin Madeira by adding more traffic and street lights. It is a small community and should express that kind of feeling to the citizens and visitors.
Madeira Cincinnati	not sure ease traffic congestion please bring back the mailbox that was on Shewango and Mingo we have to travel up to the bank where mailbox is located or down at the post office simply to mail a letter and that causes even more traffic congestion simply to get to where the mailboxes are shame on them for removing the boxes BRING THEM BACK NOW GRRRRRRRR!	no mailbox on street on Shewango anymore grrrr its hard to get on Hosbrook off of Shewango Hill heavy traffic we do need sidewalks too
Madeira Cincinnati	I think the speed limit on Hosbrook should increase to 35. That would be reasonable and safe.	
Madeira Cincinnati	extra lane for merging onto, better vision, driveways directly across from each other — all at north end south of Montgomery Rd	my street -- the occasional young driver speeding on narrow residential street with lots of kids. Hosbrook -- crowded and hard to see over hill when approaching Montgomery rd.
Madeira Cincinnati	Sidewalks on Juniperview, Pinneedle, and Dawson would be biggest help to me. We take a lot of walks in our area and sidewalks are missing in these areas.	Greatest concern is tight right turn from Hosbrook onto Euclid. It's difficult to make the turn with a big vehicle when there are cars in the left hand turn lane on Euclid.
Madeira Cincinnati	If traffic is to increase on Hosbrook Rd due to the development on the corner of Hosbrook and Montgomery. I would like to see Shewango (the street that connects Hosbrook to Miami Avenue) improved. Sidewalk installed and something to decrease the speed of traffic traveling thru this street. People run the stop signs. And parked cars on Shewango also poses problems with increased traffic. This is a sloped street and individuals tend to drive too fast.	Decreased SAFETY! Increased traffic and speed. Safety for the pedestrian traffic - a lot of people walk their dogs, children walk to/from the high school, and families ride their bikes.
Cincinnati	sidewalks would be GREAT - we would like to walk more in the neighborhood with kids but are concerned about their safety (and ours) when there is no clear separation between car traffic & pedestrian. Lots of dog walkers would appreciate it also.	Hosbrook can be busy with cars going faster than posted speeds. No sidewalks or walking areas on Hosbrook very concerned about our children's safety if they were to try to cross Hosbrook or walk/bike along road

Appendix B – Sycamore Township, Ohio Speed Study Results

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Cincinnati	Speeding is a concern considering McDonald Commons is so near, and there are not even signs warning of Park Entrance, children, etc. Cars only slow down given the curve just past Paxton Lumber. Quite often police cars are the greatest offender, and without lights or sirens going	At the end of Dawson (at Miami) there is a Pedestrian crosswalk (with newly installed light) cars still do not stop, even with pedestrian in middle of road crossing, it is a shame and a crime. Cars need to start getting ticketed, even if it comes down to a targeted enforcement of police working in tandem to catch the offenders.
Madeira	I'm not aware of safety problems. Personally I think the speed limit of 25mph is too low for this street	I live on a street near the H.S. My biggest concern is the teenagers tearing through the neighborhood at breakneck speeds, not stopping at stop signs, etc. when school gets out for the day. There are a lot of small children and elderly folks in this neighborhood.
Cincinnati		My greatest concern is failure of cars to stop at the stop signs on Buckeye Crescent and Mapleleaf where they intersect Greenbriar. I have almost been in several accidents from cars off these streets failing to stop and/or thinking it is a four way stop.
Cincinnati		
Cincinnati	Do NOT widen Hosbrook. Keeping it as is discourages through-traffic. Widening it will only cause an increase in traffic on ALL the small cut-throughs throughout Madeira.	Widening roads only makes traffic WORSE not BETTER. Madeira's charm is thanks to its pedestrian-friendly atmosphere. Don't ruin it!
Madeira	Hosbrook needs to be widened a bit with side ditches removed.	Madeira Hills Dr. young speeders who enjoy the hills and curves. perhaps a speed bump or two?
Cincinnati	Hosbrook could use sidewalks & bike lanes to protect pedestrians & bikers from traffic. It could also benefit from some improvement to the strip centers entrance.	Greatest concern for my street is the speed of the traffic moving south on Kenwood. It's difficult for them to see our street until they crest the hill & then it could be too late to slow down for traffic exiting our street.
Madeira		Dog owners (we also have a dog) using our corner lot to let their pets defecate & not pick up. We ALWAYS carry a bag & pick-up. Cars driving too fast.
Cincinnati	Something to curtail the speeding on Lakota Dr that happens too often	I work on Hosbrook and I think 25 is too low of a speed limit for Hosbrook - I cannot even coast from Euclid to Hosbrook and stay at 25, however, since that is the speed limit that is what I try to do and I constantly have people riding my tail
Madeira	I would like to see the speed limit increased (slightly) on Hosbrook and also have a better control of traffic coming in/out of Friday's area - also would like to have a right turn only onto Hosbrook (towards Madeira) from Montgomery because a straight from West Shell buildings across Hosbrook is like taking your life in your hands because people turn left in front of you (from Hosbrook onto Montgomery), as well as turning right from Montgomery onto Hosbrook and they don't care that I have the right of way	Since i don't have a clear idea of what is being planned, i would most like any traffic from these new projects to be funneled onto Montgomery Road instead of a residential area. The increasing traffic on Euclid and Hosbrook is noisy, dangerous at times, and detracts from the neighborhood. I would love a noise ordinance to keep the noise from loud car stereos down while they line up at the light. We are just as much residents of Madeira as anyone else, and it is our homes our families and our property values that are being affected
Madeira	I am afraid of more and more cars both on Hosbrook and then onto Euclid. Please like sidewalks and front porches in residential areas. They encourage safe walking	Hosbrook seems a bit narrow for the amount of traffic that travels it daily. We have a lot of children on Cherokee and sidewalks would be safer for them and for walking.
Madeira	remember, this is a residential area, and these are our homes	
Madeira	and allow neighbors to get to know each other.

	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Madeira	I am satisfied with the safety on my street and on Hosbrook Road. I don't believe improvements are necessary.	My one concern about Hosbrook is that the traffic is limited to 25 mph. I would like to go 35 since it is a main connection to Montgomery Road. I don't have any concerns about my own street at this time.
Madeira	I really cannot speak for Hosbrook, but in my neighborhood, there needs to be speed humps to slow down drivers.	Speed
Madeira		
Cincinnati	The more sidewalks the better...People complain about them when they are asked about putting them in. No one has ever said "I like a community except for all the walkability."	Sidewalks need to be added, and buffer zones in the form of landscapes buffer, or development densities of surrounding areas need to be taken into consideration and/or adjusted every time we make changes like this. That is the only way the community will benefit in the long run.
Madeira	I think my street is more of a concern than Hosbrook. My street is a busy one and is near the elementary school. We have a lot of foot traffic because of the cut through to Rita, and unfortunately a number of people do not obey the speed limit and are not concerned with pedestrians.	Again I would like to see sidewalks on OUR street. Hosbrook is a busy street and unfortunately people do not obey the speed. But Hosbrook is NOT a road that leads to a school and the other half of the street isn't even Madeira. Let's take care of the routes our young children use to walk to school before taking care of Hosbrook.
Madeira		
Cincinnati	Sidewalks added throughout Madeira. I don't feel safe even where there are bike paths on busy roads like Kenwood, so Hosbrook would be better off with sidewalks.	Sidewalks added throughout Madeira. Hosbrook doesn't seem to be an issue to me. My street and others (all over) Utility poles and above-ground utility lines are ugly. They can result in safety hazards during storms and are prone to power outages.
Madeira		
Madeira	MADEIRA	See above
Cincinnati	Increase lane widths	My street and Hosbrook Road do not cross. In fact, why did you send me the survey link?
Traffic Calming Study, Hosbrook Road Corridor, Sycamore Township, Ohio		158

Cincinnati	OH	45243	No											
Madeira	OH	45243	Yes	Problem	No									
Cincinnati	OH	45227	Yes	Small Problem	No	The left turn light from Hosbrook to Montgomery Rd is of adequate length of time.								
Cincinnati	OH	45243	Yes		No									
MADEIRA	OH	45243	Yes	Severe Problem	Yes	At each end there seems to always be a backup to the point that I avoid it if I can. The worst is at Montgomery because people turn onto Hosbrook and immediately stop trying to turn left into the shopping area.								
Madeira	OH	45243	No		N/A	There is rarely traffic on the road when I am on it. The traffic at the light (turning from Hosbrook to Montgomery) is usually several cars deep, but I've never had to wait more than 1 light to get through the intersection.								
														N/A

Appendix B – Sycamore Township, Ohio Speed Study Results

		Do you find it difficult to make left turn movements onto side streets from Hosbrook Road?	Do you find it difficult to make left turn movements onto Hosbrook Road from side streets?
Cincinnati	No	I make a left turn every weekday morning at 7:30 and currently it is not a problem. Not happy about possibly more traffic.	No I make a left turn every weekday morning at 7:30 and currently it is not a problem, but if will be with the two new office buildings. Also concerned about the additional traffic on Miami Hills Dr when it is used to avoid Euclid.
Cincinnati	No	I only travel from Penn Station or that shopping area - rarely have issue	No I only travel from Penn Station or that shopping area - rarely have issue generally coming from either Euclid or Montgomery--- can be busy on those streets--slowing down the ability to get onto Hosbrook.
Cincinnati	No		Yes
madeira	No		No Sometimes it can be a small problem due to visibility.
Cincinnati	No	no problem	No
Cincinnati	No	The traffic moves too fast so you have to be cautious. My wife was in an accident on Hosbrook when someone pulled out in front of her from the office building where the radio stations are.	Yes The traffic is going too fast and many people use it as a cut through to get to Indian Hill or even Newtown and Eastgate.
MADEIRA	Yes		No I have only done this a few times. Usually I turn onto Montgomery.
Madeira	No	I admit, I don't do that very much.

Appendix B – Sycamore Township, Ohio Speed Study Results

		Please take this opportunity to explain your greatest concerns on your street and Hosbrook Road.
Cincinnati	In what manner would you like to see improvements be implemented to increase the safety of your current street and Hosbrook Road?	
Cincinnati	Yes-alot more traffic on the east side of Miami Hills Dr.	Unnecessary increase in traffic on Hosbrook and Miami Hills Dr and Euclid.
Cincinnati	We often take walks. Sidewalks would be very helpful for someone with a stroller and dog	I really don't have a concern about Hosbrook. We'd like to see sidewalks on Dawson and other side streets
Cincinnati	25 MPH speed limit on Euclid within 2 blocks of Miami. Sidewalks everywhere.	Hosbrook has speeding problems near montgomery, I get tailgated below 35 MPH but otherwise it's not bad. Euclid from Laurel to Miami is nuts - the speed limit is 25 mph at the end by Camargo, then it increases to 35 as you go uphill past Laurel to a blind hill where children play and there is a crosswalk. It is a little scary crossing that street, and visiting relatives find it scary to pull out of our driveway because of the speeding by drivers approaching the blind hill.
Cincinnati	Sidewalks would be great for walkers and little kids on bikes.	Traffic moves too fast. It is a residential area with many children and someone is going to get hurt or killed. Thomas Drive leads to Madeira Elementary School and that means lots of children every day.
MADEIRA	I would like to see speed humps installed on both streets and more patrols. Also I would like to see on street parking limited to one side on the road. I don't care which one, just one.	My greatest concern on Hosbrook Road is that the speed limit is 25 mph and it is rare that people drive that speed. Many speed through at 40 or so, which isn't super fast, but is really too fast for a street with so many houses. Speed bumps would help make it less of a thoroughfare.
Madeira	I would like to see sidewalks/bike facilities in Madeira. Our street has them, but they end in roads without sidewalks (Camargo Rd.). Our town is small enough that we should be able to walk to the downtown area, but it is just dangerous (for adults and children) from my street.

**HOSBROOK ROAD CALMING PUBLIC HEARING
SYCAMORE TOWNSHIP, OHIO
FEBRUARY 11, 2009
08056**

**BRANDSTETTER CARROLL INC.
ARCHITECTS ENGINEERS PLANNERS**

Summary of process to date:

In the middle of 2008, Sycamore Township initiated a study group to understand the traffic concerns voiced by the residents along the Hosbrook Road corridor. This study group was comprised of officials from Sycamore Township, The City of Madeira, Hamilton County Engineers Office, and Citizens who reside in the area. Each of these groups is a stakeholder in the project and would be impacted by any modifications made to the corridor.

During the course of the stakeholder meetings, a base set of data was presented to give the stakeholders an understanding of the existing conditions. Some of the data included speed information and traffic volume data. The study group evaluated alternatives from engineering practices along with studies completed by other communities to compile a "menu" of alternatives with which to implement traffic calming techniques on Hosbrook Road.

Not all alternatives evaluated are appropriate or feasible for Hosbrook Road. However, the report will document the solutions discussed to show why they were not brought forward for consideration.

The alternatives presented at this meeting give the public an opportunity to view the alternatives and provide additional comment, over and above that which has been provided by the study group and its citizen members. Please use the back of this page to offer your written comments. In addition, 11" x 17" plan sheets of the presentation boards are available if you would like to offer an additional solution that has not already been brought forth.

Below you will find a brief description of the alternatives presented at this meeting:

- Roundabouts: These provide a circular operation at an intersection rather than either, a two way, or four way stop. The vehicles on a thru street must change their travel path in order to navigate through the traffic circle.
- Streetscaping: This traditionally includes the installation of a planting area between the street and a sidewalk. The Hosbrook Road implementation will most likely require a curb to be installed adjacent to the sidewalk for drainage purposes. The curb itself will act as a traffic-calming device by narrowing the effective width of the road.
- Gateways/Entryways: Both provide a visual notification to drivers that they are entering a neighborhood or commercial district. This helps make the area appear more as a destination rather than a means of using that road as a way to get from point A to point B.

To: 'Alice Kueckles'; 'Angela Worthen'; Don&Helen Rhoad (Drhood@cinci.rr.com); Don&Pat Lotterer (plotterer@fuse.net); Jack&Barbara Plum (jackplum@cinci.rr.com); 'Nancy Dawley'; 'Peg Groene' (pgroene55@gmail.com)
Subject: Traffic Calming poll flyer

Good morning!

I know you are all on the edge of your seats awaiting the results of our flyer generated poll regarding the Hosbrook Road sidewalk, stop signs, crosswalks, speed detection devices, and pavement markings.

Sidewalk on Hosbrook (west side): Roughly 50 – 50 in total votes. However, all but one person living on Hosbrook south of Lynnfield voted NO for a variety of reasons. These include: A 3ft sidewalk with a 2ft strip would entail “encroachment” on their small front yards; Probable need to move utility poles; Costly relocation of water & gas pipes running underground near the road.

Those in favor cite the need for safety for pedestrians, cyclists, joggers due to the high traffic volume on Hosbrook. There are many who want to walk or bicycle on Hosbrook, the majority being residents of the “interior” streets such as Tiki, Miami Hills, Ginnala & Michael.

Stop signs on Hosbrook (both sides): The great majority agrees with the stop signs as an excellent means of calming traffic. Possible sign locations are at Miami Hills and Shewango. Two residents believe stop signs cause traffic backups, and are opposed.

Crosswalks: All voted in favor, whether raised slightly, or marked, or constructed of a contrasting material.

6 inch Curbs: One resident objected (no reason given), but all others are in favor for water management purpose.

Permanent Speed Detection Devices: Very few voted on these, but most believe the portable trailer mounted devices are helpful.

Appendix E – Public Meeting Citizen Comments

Roundabouts: Only one yes vote. All others objected to the taking of large areas of their property, and said these are useless on Hosbrook.

Median strip: All were opposed to this idea, citing the prevention of left turns into their driveways when headed north on Hosbrook as well as left turns onto the street when departing to go north. Also, the “boulevard” appearance would likely encourage speeding.

Additional notes:

1. Several residents suggested that the sidewalk south of Lynnfield be only 30" wide, and abut the raised curb, thereby eliminating the 2 ft grassy or gravel filled strip.
2. Many suggested this portion of the sidewalk could “curve around” the utility poles, eliminating the need to move them.
3. The KMCA is currently obtaining bids for neighborhood “gateway signs” which say Kenwood Meadows, like the sign at Euclid & Michael. This idea has by all who have been consulted. Possible sign locations are at: Hosbrook near the Episcopal Church; Hosbrook near the Duke building service drive; and Tiki at Hosbrook Rd. KMCA will fund these signs as per Greg Bickford’s instruction.
4. One individual suggested small, low flashing lights embedded in the pavement be installed at the Hosbrook Rd. crosswalks. These have been used in Madeira and Montgomery for slowing traffic in these areas.
5. Another believes the sidewalk issue should also be discussed by the Land Use Study Committee due to the need for safety on all KM streets.

I invite your comments and suggestions today if possible as I will attend a Traffic Calming Committee tomorrow 3/12 at 3:00 pm and plan to discuss the poll results with the township officials and consultant firm.

Thanks for all your efforts,

Vint VanDerzee

Appendix E – Public Meeting Citizen Comments

Kenwood Meadows Civic Association

NOTICE OF IMPENDING CHANGES & POLL

Recently, the Sycamore Township Trustees proposed the installation of a sidewalk on the west side of Hosbrook Road as one option of the road improvement program now being developed. After much public discussion at the Township, residents voiced their objections to roundabouts and a center median.

The following are other Traffic Calming Alternatives:

- * Increased safety for all residents of Kenwood Meadows walking or biking along the street,
- * Significant calming of the fast moving traffic on Hosbrook which poses danger to Kenwood and Madeira residents both walking and driving,
- * Enhancement of the residential appearance of the main artery through our neighborhood.
- * Encroachment into front yards of approximately 6 to 8 feet, which is within the Hamilton County right-of-way boundaries.
- * Improved storm water management by means of a 6" high curb.
- * Two Stop Signs on Hosbrook; others if needed.
- * Marked or raised Crosswalks on Hosbrook, and other streets where needed.
- * Permanent Speed Education Devices and regular enforcement.
- * Striping: Edge lines; Chevrons; Crosswalks.

Please let us know your opinions

(Yes or No) by Fri. 3/06/09.

Appendix E – Public Meeting Citizen Comments

To:	Ben Brandstetter Brandstetter Carroll Inc	3/23/2009
From:	Brad Worthen Hosbrook Road Homeowner	
Re:	Hosbrook Road Traffic Calming Study	

Please find following my comments on various aspects of the Hosbrook Road Traffic Calming Study. Thank you for taking the time to discuss these plans during the open house.

High Visibility Crosswalk Markings

It is unclear exactly what type of crosswalk was specified in the plan. I have seen raised crosswalks in many other cities, and they seem to do an excellent job of both increasing visibility of the crosswalk and keeping speeds under control. I would like to see raised crosswalks across Hosbrook at the intersections. Lighted crosswalks are not a good option for Hosbrook, they are far too hard to see in the daytime.

Roundabouts

The roundabouts in the current plans are quite large. I had mentioned to some BCI employees to look at a roundabout at 17th and Pine (and others in the immediate area) in Boulder, CO. If you look on Google Maps at the Boulder intersection you will see that gives much of the slowing benefits of the larger roundabout, in a much smaller footprint. Smaller roundabouts also remove the impact on the homeowners who would lose a significant amount of land to a larger, more inefficient roundabout. I like the idea of roundabouts to slow the traffic, but I can't support the large and intrusive ones from the plans in a residential setting.

Sidewalks

Sidewalks were a very popular option among people I talked to. Most people would like to be able to walk to shopping with their families. An increasing number of houses on the street are now owned by young families, so safe travel for kids needs to be a priority. Additionally, the presence of sidewalks and people using them should (hopefully) have a calming influence on the traffic.

Since the Streetscape Alternate 2 plan had sidewalks on both the Sycamore and Madeira side, I think that should be included in the Streetscape Alternate 1 plan also. It would look much nicer, and provide a much needed drain for rainwater.

Appendix E – Public Meeting Citizen Comments

Power poles

Some of the power poles seem to be within the 5'6" + 3' additional space on the west side of Hosbrook. I don't see the power poles marked on that set of plans. I think that burying the lines would be the best solution.

Divided road (Streetscape Alt 2 plan)

I don't see how this plan will noticeably reduce speeds. My understanding is that the visual impacts of streetscaping have the most impact on 'new' drivers in an area, not regular commuters, who are surely the bulk of the traffic on Hosbrook. The removal of even the current dangers of driving on Hosbrook (opposing traffic, some steep side drop offs) and replacing them with a smooth, distraction-free driving path seems like it would only encourage higher speeds.

Additionally, the divider down the middle prevents left turns in/out of housing on a residential street - a curious decision to streetscape in such a way that impacts landowners so strongly and traffic so lightly.

Stop signs

I strongly disagree with the idea of adding stop signs on Hosbrook at any of the intersections (though I notice none are in the current plan.) It seems to me that stop signs will just increase congestion, especially during rush hour and holidays. We will end up with more lines of cars idling or crawling along bumper-to-bumper, and the rest of the time have people still driving fast, but now accelerating and braking much more than even a roundabout would cause. Turning out of the side streets isn't any more of a problem now than pulling out of a driveway - you have to wait during rush hour, but it's not impossible. If the cars consistently moved at 25 MPH this wouldn't be an issue for side streets or drivers.

Thank you,

Brad Worthen

HOSBROOK ROAD TRAFFIC CALMING PUBLIC MEETING

Name: Sylvia
BOBERT(BOB) / EDWARDS Phone No: (513) 791-0590

Address: 7511 Hosbrook Road
45243

Comments: We are not interested in the
street-scaping as roundabout alternatives.
Space, around about C Miami Hills Hosbrook,
the idea of entrance / gateway signage
identifies the area as a neighborhood.
Think a designated crosswalk C Hosbrook
and Miami Hills (quiet section, blinking
ground lights as done in Montgomery
and Madienia in a couple of areas) will
have to have traffic. A 4-way stop
at Miami Hills & Hosbrook?

PLEASE MAIL OR FAX YOUR COMMENTS TO:

HOSBROOK ROAD TRAFFIC CALMING PUBLIC MEETING

Name: Pat Solimine Phone No: 658-6132

Address: 7367 Hosbrook Rd. 45243

Comments: The minimum that needs to occur is actual sidewalks on both sides of Hosbrook. The one problem that is not addressed at all: Is how to safely cross Hosbrook by bike or on foot, etc? Although no traffic lights are proposed, I would propose a crossing light. Madeira has a light on Euclid that is always green except when someone needs to cross. I would propose putting such a light at Hosbrook and Miami Hills.

Subject: Re: Sidewalk on Hosbrook

We are not in agreement with adding a sidewalk, curbs and grassy strip.

Adding an additional stop sign at Miami Hills and Hosbrook makes sense - a four way stop. In addition, adding a lighted/brick insert in the street defining the cross walk (as done on a couple of spots in Madeira and Montgomery). Having to make this stop will slow traffic on this thru street. Add to this the light planned at the "curve" closer to Montgomery Road.....already enough to seek another street for travel. A round-about at Miami Hills and Hosbrook also is attractive. I would not suggest more than one "round-about" on the street.

Entrance or Gateway signage also indicates a neighborhood, thus slowing traffic. Definitely think this should be done along Hosbrook.

We have measured the amount of space indicated for a curb, grassy strip and sidewalk. We are not interested in "opening up" the area across the front of our property to that degree.

In our opinion, sidewalks, etc. also give the indication that the road is wider, (visually, though not in reality). Feel this would only encourage traffic and speed.

Don't believe the ultimate use of these sidewalks justifies the expense and aggravation of construction. Sidewalks "invite" anyone/everyone into your neighborhood. With the size of the Kenwood shopping/business area, drawing thousands to this area, I am not interested in further opening up our neighborhood - via sidewalks - to all.

In addition, how would the extreme drop-off of the wooded area adjacent to Lynnfield be handled? A bridge?

In the 45 years that we have lived here, there has not been a strong desire for sidewalks, except perhaps, when this neighborhood was home to many children. Such is not the case today.

HOSBROOK ROAD TRAFFIC CALMING PUBLIC MEETING

Name: Denny Connor Phone No: 793-9152

Address: 6767 Miami Hills Dr

Comments: Like: sidewalks, visible crosswalk markings, gateway signs;

Dislike: Medians (for Hosbrook residents inconvenient)

Neutral: Roundabouts (good for traffic calming, but more expensive & require more land)

All choice:

Would like to see the road widened (if possible) with sidewalks & markings for crosswalks & gateways

HOSBROOK ROAD TRAFFIC CALMING PUBLIC MEETING

Name: TEALA McQUILKIN Phone No: 891-6835

Address: 6760 MICHAEL DRIVE

Comments: PLEASE DO NOT IMPLEMENT ROTARIES(ROUNDABOUTS),
PEOPLE DO NOT KNOW HOW TO DRIVE, AND NEGOTIATE THESE,
AND THERE WILL BE MANY ACCIDENTS.

I REALLY LIKE THE IDEA OF SIDEWALKS ON ONE SIDE OF
THE STREET

I DO NOT LIKE THE IDEA OF MEDIANs. THESE ARE
DIFFICULT TO MAINTAIN AND ARE A HARDSHIP FOR
RESIDENTS LIVING ALONG THIS STREET.

I DO NOT NECESSARILY LIKE THE IDEA OF LEFT TURN
LANES IF TRAFFIC IS NOT EXPECTED TO INCREASE. THIS
WILL INCREASE THE SPEED OF THE THROUGH TRAFFIC
AND MAKE THE STREET APPEAR WIDER

MEMORANDUM

FROM: KENWOOD MEADOWS CIVIC ASSOCIATION (KMCA)

TO: SYCAMORE TOWNSHIP TRUSTEES

SUBJECT: HOSBROOK ROAD TRAFFIC CALMING STUDY RECOMMENDATIONS

DATE: March 7, 2009

BACKGROUND

The KMCA began discussions with the Sycamore Township Trustees in early 2007. These discussions were focused on various impacts to our neighborhood as a result of significant commercial development in the Kenwood area. At that time, it was anticipated that about 1,000,000 sq. ft. of new office, retail, and commercial development would be constructed. Of particular concern were the redevelopment of the now vacant motel site (Neyer) and the development of the former Lone Star Restaurant site.

As a result of this development, it was obvious the Meadows neighborhood would be subjected to high traffic volumes on Hosbrook Road, decreased safety for motorists and pedestrians, and potential for cut through traffic. It was also realized that similar impacts would affect residences both to the east and west of Hosbrook Road. As a result of aggressive efforts by the KMCA, the Township convened a "Hosbrook Traffic Calming Study" Committee. This Committee was composed of members from the Meadows neighborhood, Hamilton County Engineer's office, Township administrative staff, and the City of Madeira.

The first meeting of the Committee was held in May, 2007. Periodic meetings were held for the purpose of developing traffic control alternatives which would achieve the objective of protecting the residential areas from negative impacts caused by the commercial development.

A public meeting was held on Wednesday, February 11, 2009. Various exhibits, maps, and charts were available for the public to examine and to comment.

The purpose of this memorandum is to provide the Trustees with recommendations of the KMCA based on material provided at the public meeting. These recommendations have been submitted to the membership at large and, thus, can be considered to generally represent the interests of the Meadows neighborhood at large. However, each resident may speak for themselves if they desire to do so.

Appendix E – Public Meeting Citizen Comments

RECOMMENDATIONS AND CONCLUSIONS

General

The “Roundabout” alternative is unacceptable. Too much right-of-way will be required and some houses would be razed.

The “Boulevard” concept is also unacceptable. The installation of a median in Hosbrook Road is not practical and would cause hardship on the residences since it would prohibit left turns into and out of driveways.

Hosbrook Road design criteria should be very carefully selected. It is well understood, within urban engineering and planning design principles, that careful design can be an important factor in controlling the speed and driver awareness. Every effort should be made to avoid the appearance of a “wide” Hosbrook Road since that would encourage higher speeds and weaken its residential character.

It is recommended that the roadway, if reconstructed, should be no wider than two lanes of travel. Presently, the lanes are about 11 feet wide. The objective is to maintain a narrow “footprint”.

The slight curve at the northern end of Hosbrook Road should be retained since this creates a gateway effect for motorists and encourages slower speeds and awareness of pedestrians and bicyclists. Note that this element should be carefully coordinated with the pending design of the proposed Hosbrook Road connector, serving the former motel site.

Landscaping and urban streetscape elements should be introduced in the final design. This would include appropriate signage at key intersections, gateway landscaping, and crosswalks.

An important objective of the Calming Study was to mitigate the expected high volume of cut through traffic in both the Meadows neighborhood and in the City of Madeira. To date, very little attention has been given to solutions for this problem. We ask that this issue be addressed in more detail.

No recognition has been given to the Township Traffic Impact Study. This Study recommended widening of Hosbrook (e. g. 5-lanes at Montgomery and 3-lanes at Euclid) and the Hosbrook connector road to the motel site. These modifications are a direct result of potential commercial developments. We ask that this critical element be addressed.

FUNDING OF IMPROVEMENTS

No cost estimates have been prepared to date for any of the alternatives. It would be helpful to have some idea of approximate cost of the various design elements as this Study process moves forward. We believe this should be addressed.

It is important that the Trustees provide clear explanations related to how these improvements will be funded. We know the Trustees are on record, and have shown a willingness, to fund infrastructure improvements beneficial to both the Neyer and Lone Star developments with Tax Increment Funding (TIF) methodology. The KMCA requests that the Trustees also commit to funding the Traffic Calming improvements using the same TIF funding method. It is our understanding that sufficient TIF funding is available.

Appendix E – Public Meeting Citizen Comments

Appendix E – Public Meeting Citizen Comments

Equally important is a recognition that part of Hosbrook Road is within the City of Madeira. We need information related to how improvements will be implemented, both administratively and financially.

Without a carefully thought out financial/funding program, the Study has very little practical value.

Specific Improvements

The following recommendations are related to specific design elements:

1. A sidewalk should be installed on the west side of Hosbrook Rd. to provide a continuous pedestrian path from Euclid to Montgomery Rd. A new sidewalk will widen the "foot print" of Hosbrook Road. Every effort should be made to minimize the negative affect on front yards of existing Township residences. Details need to be provided by the Study Consultant related to impact on utility poles, valves, fire plugs, existing landscaping, etc. There are several alternate designs that need to be presented and evaluated.

The KMCA will provide more information and comments on this element of the Calming Study as a result of the "flyer" circulated in the neighborhood. There is a definite difference of opinion about sidewalks, both for and against, by residences along Hosbrook. More discussion and information is needed before a decision can be made.

2. Four way stop signs should be installed on Hosbrook Road at Miami Hills and three way stop signs at Shewango;
3. The existing speed limit of 25 mph should be retained. A regular ongoing coordinated enforcement program should be established by Madeira and Township police officers;
4. Clearly marked crosswalks should be provided at all key intersections. The crosswalks should be constructed using best practice traffic design principles which would include consideration of different pavement types (e.g. brick pavers), warning signs, pavement markings, raised crosswalk and/or raised intersections (e. g. speed tables);
5. Additional landscaping should be provided to replace existing landscaping elements (e. g. trees and shrubs) which will be removed as a result of the sidewalk construction. Additional buffering should also be considered.
6. Existing drainage problems should be corrected. This will be possible as a result of the construction of a curb/sidewalk; and
7. Gateway signs and landscaping should be installed at key intersections along Hosbrook Road, and Euclid Road.

We request that KMCA be provided with a written response to the above.

Thank you.

11 March 2009

Ben

2) While the current MUTCD has more lenient language, it does state that "Stop" signs should not be used for speed control. The County's policy is to install "Stop" signs only where they meet the warrants.

3) The County doesn't intend to raise the 25mph limit. Enforcement is up to police.

4) Depending upon the final recommendations of the study, the County would explore striping crosswalks. However, crosswalks would be installed only where they are justified, needed and could be safely located, i.e. at those locations where they would not create safety problems for either the pedestrian or the driver. Again, depending upon the final recommendations of the study, different pavement markings, pavement coloration, etc., could also be investigated and possibly used. However, raised speed tables, speed humps, speed bumps, etc. cannot be installed.

It should be noted that these comments are consistent with those that have been made by the County since the beginning of the study.

Contact me if you have any questions regarding these comments.

Appendix F - Stop Sign Implementation Discussion

Many residents and members of the Traffic Calming Committee expressed their desire to have stop signs installed at intersections along Hosbrook Road. Much discussion and debate was spent on the feasibility and implementation of stop signs within this corridor. Further investigation by Brandstetter Carroll Inc. showed that the Manual on Uniform Traffic Control Devices (MUTCD) published by the Federal Highway Administration (FHWA) specifically states that "STOP signs should not be used for speed control". A copy of the complete section from the MUTCD is included in this Appendix. It is for this reason that Stop signs were not pursued as an alternative in this study.

Appendix F - Stop Sign Implementation Discussion

Page 2B-8

2003 Edition

Guidance:

The decision to install multiway stop control should be based on an engineering study.

The following criteria should be considered in the engineering study for a multiway STOP sign installation:

- A. Where traffic control signals are justified, the multiway stop is an interim measure that can be installed quickly to control traffic while arrangements are being made for the installation of the traffic control signal.
- B. A crash problem, as indicated by 5 or more reported crashes in a 12-month period that are susceptible to correction by a multiway stop installation. Such crashes include right- and left-turn collisions as well as right-angle collisions.
- C. Minimum volumes:
 1. The vehicular volume entering the intersection from the major street approaches (total of both approaches) averages at least 300 vehicles per hour for any 8 hours of an average day, and
 2. The combined vehicular, pedestrian, and bicycle volume entering the intersection from the minor street approaches (total of both approaches) averages at least 200 units per hour for the same 8 hours, with an average delay to minor-street vehicular traffic of at least 30 seconds per vehicle during the highest hour, but
 3. If the 85th-percentile approach speed of the major-street traffic exceeds 65 km/h or exceeds 40 mph, the minimum vehicular volume warrants are 70 percent of the above values.
- D. Where no single criterion is satisfied, but where Criteria B, C.1, and C.2 are all satisfied to 80 percent of the minimum values. Criterion C.3 is excluded from this condition.

Option:

Other criteria that may be considered in an engineering study include:

- A. The need to control left-turn conflicts;
- B. The need to control vehicle/pedestrian conflicts near locations that generate high pedestrian volumes;
- C. Locations where a road user, after stopping, cannot see conflicting traffic and is not able to reasonably safely negotiate the intersection unless conflicting cross traffic is also required to stop; and
- D. An intersection of two residential neighborhood collector (through) streets of similar design and operating characteristics where multiway stop control would improve traffic operational characteristics of the intersection.

Section 2B.08 YIELD Sign (R1-2)

Standard:

The YIELD (R1-2) sign (see Figure 2B-1) shall be a downward-pointing equilateral triangle with a wide red border and the legend YIELD in red on a white background.

Support:

The YIELD sign assigns right-of-way to traffic on certain approaches to an intersection. Vehicles controlled by a YIELD sign need to slow down or stop when necessary to avoid interfering with conflicting traffic.

Section 2B.09 YIELD Sign Applications

Option:

YIELD signs may be used instead of STOP signs if engineering judgment indicates that one or more of the following conditions exist:

- A. When the ability to see all potentially conflicting traffic is sufficient to allow a road user traveling at the posted speed, the 85th-percentile speed, or the statutory speed to pass through the intersection or to stop in a reasonably safe manner.
- B. If controlling a merge-type movement on the entering roadway where acceleration geometry and/or sight distance is not adequate for merging traffic operation.
- C. The second crossroad of a divided highway, where the median width at the intersection is 9 m (30 ft) or greater. In this case, a STOP sign may be installed at the entrance to the first roadway of a divided highway, and a YIELD sign may be installed at the entrance to the second roadway.
- D. An intersection where a special problem exists and where engineering judgment indicates the problem to be susceptible to correction by the use of the YIELD sign.

Standard:

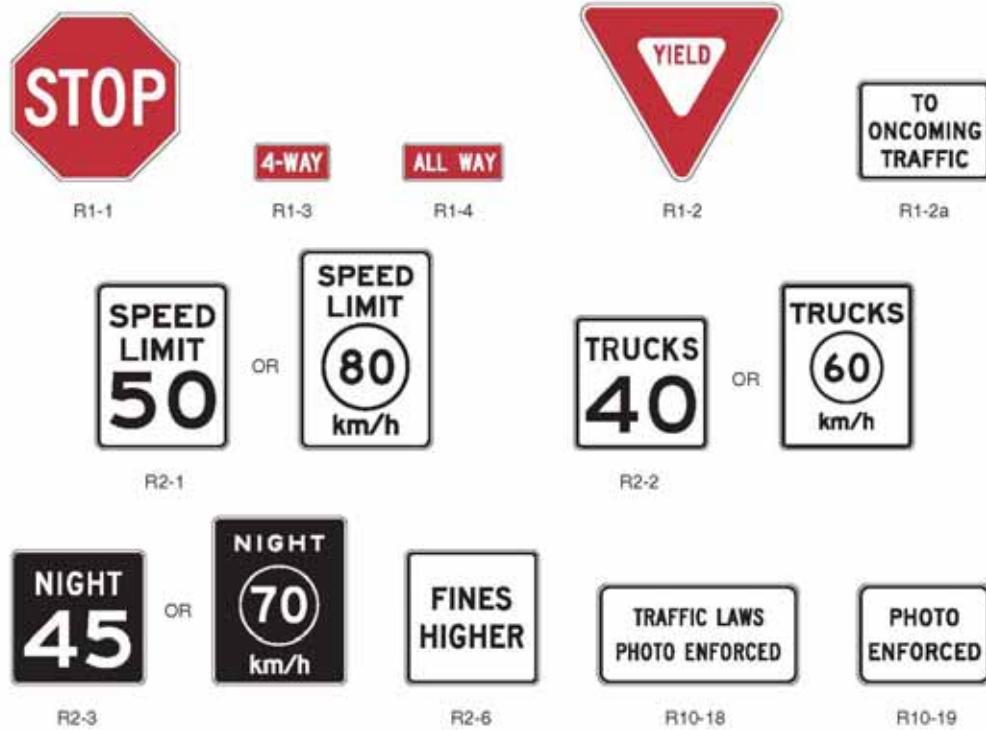

A YIELD (R1-2) sign shall be used to assign right-of-way at the entrance to a roundabout intersection.

Appendix F - Stop Sign Implementation Discussion

2003 Edition

Page 2B-9

Figure 2B-1. STOP, YIELD, Speed Limit, FINES HIGHER, and Photo Enforcement Signs

Section 2B.10 YIELD Sign Placement

Standard:

The YIELD sign shall be installed on the right side of the approach to which it applies. YIELD signs shall be placed on both the left and right sides of approaches to roundabout intersections with more than one lane on the signed approach where raised splitter islands are available on the left side of the approach. When the YIELD sign is installed at this required location and the sign visibility is restricted, a Yield Ahead sign (see Section 2C.29) shall be installed in advance of the YIELD sign.

The YIELD sign shall be located as close as practical to the intersection it regulates, while optimizing its visibility to the road user it is intended to regulate.

YIELD signs and STOP signs shall not be mounted on the same post.

Guidance:

Other than a DO NOT ENTER sign, no sign should be mounted back-to-back with a YIELD sign in a manner that obscures the shape of the YIELD sign.

Support:

Section 2A.16 contains additional information about separate and combined mounting of other signs with YIELD signs.

Guidance:

Yield lines, when used to supplement a YIELD sign, should be located at a point where the road user should yield (see Section 3B.16).

Where two roads intersect at an acute angle, the YIELD sign should be positioned at an angle, or shielded, so that the legend is out of view of traffic to which it does not apply.

Sect. 2B.10

Appendix F - Stop Sign Implementation Discussion

Page 2B-10

2003 Edition

Except at roundabout intersections, where there is a marked crosswalk at the intersection, the YIELD sign should be installed in advance of the crosswalk line nearest to the approaching traffic.

At a roundabout intersection, to prevent circulating vehicles from yielding unnecessarily, the face of the YIELD sign should not be visible from the circulatory roadway.

Option:

At wide-throat intersections or where two or more approach lanes of traffic exist on the signed approach, observance of the yield control may be improved by the installation of an additional YIELD sign on the left side of the road and/or the use of a yield line. At channelized intersections, the additional YIELD sign may be effectively placed on a channelizing island.

Section 2B.11 Yield Here To Pedestrians Signs (R1-5, R1-5a)

Standard:

If yield lines are used in advance of an unsignalized marked midblock crosswalk, Yield Here To Pedestrians (R1-5 or R1-5a) signs (see Figure 2B-2) shall be placed 6.1 to 15 m (20 to 50 ft) in advance of the nearest crosswalk line (see Section 3B.16 and Figure 3B-15).

Section 2B.12 In-Street Pedestrian Crossing Signs (R1-6, R1-6a)

Option:

The In-Street Pedestrian Crossing (R1-6 or R1-6a) sign (see Figure 2B-2) may be used to remind road users of laws regarding right of way at an unsignalized pedestrian crossing. The legend STATE LAW may be shown at the top of the sign if applicable. The legends STOP FOR or YIELD TO may be used in conjunction with the appropriate symbol.

Guidance:

If an island (see Chapter 3G) is available, the In-Street Pedestrian Crossing sign, if used, should be placed on the island.

Standard:

The In-Street Pedestrian Crossing sign shall not be used at signalized locations.

The STOP FOR legend shall only be used in States where the State law specifically requires that a driver must stop for a pedestrian in a crosswalk.

If used, the In-Street Pedestrian Crossing sign shall have a black legend (except for the red STOP or YIELD sign symbols) and border on either a white and/or fluorescent yellow-green background.

If the In-Street Pedestrian Crossing sign is placed in the roadway, the sign support shall comply with the breakaway requirements of the latest edition of AASHTO's "Specification for Structural Supports for Highway Signs, Luminaires, and Traffic Signals" (see Page i).

Support:

The Provisions of Section 2A.18 concerning mounting height are not applicable for the In-Street Pedestrian Crossing sign.

Option:

The In-Street Pedestrian Crossing sign may be used seasonably to prevent damage in winter because of plowing operations, and may be removed at night if the pedestrian activity at night is minimal.

Section 2B.13 Speed Limit Sign (R2-1)

Standard:

After an engineering study has been made in accordance with established traffic engineering practices, the Speed Limit (R2-1) sign (see Figure 2B-1) shall display the limit established by law, ordinance, regulation, or as adopted by the authorized agency. The speed limits shown shall be in multiples of 10 km/h or 5 mph.

Guidance:

At least once every 5 years, States and local agencies should reevaluate non-statutory speed limits on segments of their roadways that have undergone a significant change in roadway characteristics or surrounding land use since the last review.

No more than three speed limits should be displayed on any one Speed Limit sign or assembly.

When a speed limit is to be posted, it should be within 10 km/h or 5 mph of the 85th-percentile speed of free-flowing traffic.

Sect. 2B.10 to 2B.13

Appendix F - Stop Sign Implementation Discussion

2003 Edition

Page 2B-11

Figure 2B-2. Unsignalized Pedestrian Crosswalk Signs

Option:

Other factors that may be considered when establishing speed limits are the following:

- A. Road characteristics, shoulder condition, grade, alignment, and sight distance;
- B. The pace speed;
- C. Roadside development and environment;
- D. Parking practices and pedestrian activity; and
- E. Reported crash experience for at least a 12-month period.

Two types of Speed Limit signs may be used: one to designate passenger car speeds, including any nighttime information or minimum speed limit that might apply; and the other to show any special speed limits for trucks and other vehicles.

A changeable message sign that changes the speed limit for traffic and ambient conditions may be installed provided that the appropriate speed limit is shown at the proper times.

A changeable message sign that displays to approaching drivers the speed at which they are traveling may be installed in conjunction with a Speed Limit sign.

Guidance:

If a changeable message sign displaying approach speeds is installed, the legend YOUR SPEED XX km/h (MPH) or such similar legend should be shown. The color of the changeable message legend should be a yellow legend on a black background or the reverse of these colors.

Support:

Advisory Speed signs are discussed in Sections 2C.36 and 2C.46 and Temporary Traffic Control Zone Speed signs are discussed in Part 6.

Section 2B.14 Truck Speed Limit Sign (R2-2)

Standard:

Where a special speed limit applies to trucks or other vehicles, the legend TRUCKS XX or such similar legend shall be shown on the same panel as the Speed Limit sign or on a separate R2-2 sign (see Figure 2B-1) below the standard legend.

Sect. 2B.13 to 2B.14

PUBLIC MEETING
HOSBROOK ROAD TRAFFIC CALMING STUDY
SEPTEMBER 29, 2009

J. Janus, Jr.
4462 Daffodil Avenue
Sycamore Township
Blue Ash, Ohio
45242-7820

PHONE NO: _____

ADDRESS: This is the second hearing I have attended as I recall.

In this one as the last one ,you ignored taking any questions from
the "token" crip.If you wish look at the online story out there now
on it.I am the closest person to you in the pic. Do you live in
Sycamore Township? Who cares about the comments from
COMMENTsone fro Madeira there? They are not paying for it at all!!!!
By the "postal: Ikke comments from Kent, followed by Bishop, It is
obivous that this was basically a waste of time. They paid for
with our Money apperently a nice pwoer point, your time again, and
a PP demo. You should have allowed our questions more, not the
mantra of Bishop and Kentxx. Neither of them live on or around that
area. Le me know the next time you will come back to make another
public hearing presentation. Calming study???? You actually come
up with words like that for a public hearing? There was
miniscule presentation about anything that would affect any
disabled pedestrains residents, motorists in and around
this area/ Why not? Next time forget the PP so much, and
take questions from more ST residents. Not Madeiara residents
if they are not paying for it? When will you and what are you
going to recommend now to all Sycamore Township citizenry and
by whom and what methods will all Sycamore township citizenry be
informec of your decision?

COMMENTS: Very good presentation.

Audience (resident) participation was excellent & reflected their keen interest in the various T.C. alternatives. Most are justifiably concerned about some of the possible changes.

1. Sidewalk on west side of road; those living south of Lynnfield are ~90% opposed as front yards are small/short. Suggest 36"-48" width maximum width.

2. Crosswalks; most agree these are needed at intersections w/ Miami Hills & Shewingo, or Lynnfield. Should be marked w/ signs, and pavement marking.

3. Traffic median end-to-end; absolutely NOT

4. Traffic islands - my opinion is - NO! Creates safety hazard; PLEASE MAIL OR FAX YOUR COMMENTS TO:

COMMENTS: Personally we are not interested,
and are vehemently opposed to sidewalks
across the front of our home.

Considering the depth of our lot, a sidewalk
would encourage the public into
what I consider our "personal space";
not to mention some major disruption to
our landscaping.

The lots along Hosbrook, between Montgomery
and Lyndale are deeper; the homes further
back from the road compared to the remaining
homes on the street. We have no opposition to a side-
walk on this portion of the street.

Subject: RE: Hosbrook Road "Traffic Calming" comments

Good Morning Mark,

Thanks for the comments. When I stated that the widening would only impact the twp side, I meant that from the perspective of the sidewalk; you are correct that there is some widening within the public right-of-way at Montgomery and Euclid for those intersections to be improved. As for the businesses on the Madeira side, there have not been any final discussions with the county engineer on this, so nothing was depicted on the plan. We have talked with the owner of Chi-Natti's Pizza and he indicated his initial approval of eliminating the curb cut at the north end to improve turning movements at the intersection. All traffic entering the commercial area would use an improved curb cut to the south.

I'll pass along your comments on the turns at the intersections and lighting. Since this is just a preliminary alignment and not an actual design, I'm sure the engineers will take this into considerations.

Again, thanks for taking the time to comment. Call me if you have any additional questions.

Subject: Hosbrook Road "Traffic Calming" comments

Mr Moeller-

Firstly, I would like to thank your office for keeping the residents of Hosbrook Rd informed of the status of the plans regarding our street.

In reviewing the information, I have a few comments regarding items I believe are under-developed in the plan.

- 1) Your letter states that the road widening will only impact the township side of the street, but this is not how the plan represent the widening. If you look at drawing C-601 and C-604 there are clear impacts to the Madeira side of the street where lanes are being added near Montgomery Rd and Euclid Av.
- 2) The access drives to Madeira businesses on the North end of Hosbrook are not considered. Sheet C-601 does not even consider that traffic. This is unacceptable because our own businesses need to be given the same consideration as the townships. Also, traffic heading South on Hosbrook that stops to turn left into the first drive (that leads to the camera shop and the pizza restaurant) is one of the biggest problems in this area. It would be nice to see it addressed in the plan.
- 3) The turn radiiuses on the West side of the street at the Montgomery and Euclid intersections appear to be much too tight. The steep grade of the Montgomery Road connection requires a radiuses greater than usual, and the Euclid Av radiuses have been acknowledged as being too tight for some time, but the plans do not show them being increased.
- 4) Lighting improvements are not detailed enough to make comments. These need to be detailed so that residents know what is being proposed.

As far as the overall plan, it appears to be well researched, and as much as I would prefer the Township to address their increased traffic on their own streets, I realize this desire is a little selfish. Please continue to keep us informed.

Appendix G – Meeting Comments

Dick Kent
Sycamore Township Trustee
8540 Kenwood Road
Cincinnati OH 45236

October 7, 2009

I regret that I could not attend the Sept. 29 session regarding Hosbrook Road traffic calming. I do have some comments for your consideration. It was reported that there was doubt expressed that anyone would use the proposed sidewalks on the west side even if they were built. I disagree with that assessment. I live on Bobby Lane and I walk my two dogs through much of Kenwood Meadows most days. Occasionally I take Miami Hills across Hosbrook into Madeira for a change of site. That is the only feasible way for me to get there. The alternative of going from Lynnfield to Shewango requires that we go along Hosbrook without the benefit of sidewalk. The hazard of this is what prevents me from doing this.

Further, with sidewalks, my wife and I would be able to walk to the Montgomery Road business area near Hosbrook from our house rather than drive. This would provide us with a pleasant way to both exercise and shop or eat there. I often see kids walking up the Hosbrook hill from Montgomery. I shudder for their safety. There is no way we would consider doing that now.

I encourage you to pursue the sidewalk option as a desirable and valuable feature of the Hosbrook plans.

Sincerely,

Richard Barnes

PUBLIC MEETING
HOSBROOK ROAD TRAFFIC CALMING STUDY
SEPTEMBER 29, 2009

NAME: Larry Meyer PHONE NO: 793-1591
ADDRESS: 7687 Ginnala Ct.

COMMENTS: I agree with the townships idea not to do the roundabouts, because of the expense, the negative changes to the neighborhood, and the inexperience of Ohio Valley motorists in dealing with the roundabouts which could produce accidents.

As a retired engineer, I want to tell you that you will need to do detailed engineering of the proposed changes at the Lynfield and Hosbrook intersection, the Hosbrook widening there, and especially the sidewalk because you are getting awfully close to the very steep and very deep hill side at the corner of the Swim Club property. Also, the water run off at this location is heavy and where does it drain? Is there a drainage culvert under the end of Lynfield? The water must have somewhere to go! I

PLEASE MAIL OR FAX YOUR COMMENTS TO:

think this is at the root of the concerns voiced by others at the meeting on the subject of drainage.

COMMENTS: I have lived on Hosbrook for 51 years. I do not want a sidewalk in my yard. I pay taxes on every foot of this property, it belongs to me not the township. Whoever thought that a 1.3 million dollar sidewalk on one side of Hosbrook would slow traffic, should go back to school. I have asked for years for a deputy to give tickets. You can't find a cop on Hosbrook with a search warrant!

COMMENTS: I AM DEEPLY OPPOSED TO HAVING MY PROPERTY CONFISCATED FOR A SIDEWALK! I FIND IT HARD TO UNDERSTAND HOW SO MUCH TIME AND MONEY COULD BE WASTED AND THE END RESULT IS A SIDEWALK. IT WAS ADMITTED THAT A SIDEWALK ON ONLY ONE SIDE OF THE STREET WILL NOT "CALM" THE TRAFFIC. WHY WOULD WE SPEND \$1.3 MILLION ON A HALF-ASSED SOLUTION? THE WAY TO SLOW TRAFFIC IS WITH A COP! THEY GENERATE INCOME FOR THE COUNTY AND IS THE MOST EFFECTIVE SOLUTION. NO SIDEWALK
