**Waste Water Treatment Plant III
4400 Pollard Rd
7.5-Ton Packaged A/C Unit
15-Ton Two Stage Split System A/C Unit**

Scope of work:

It is the intent of the following specification to describe the **minimum** requirements to provide all material, labor, equipment and supervision necessary to install one new 15-ton high efficiency split-system and one new 7 1/2-ton package unit system to replace existing units at the afore mentioned facility. The selected contractor will be a licensed HVAC contractor in the State of Florida and comply with all current industry standards and building codes. Installation will include units, piping, any required duct work/transitions, any required support system, low voltage wiring and programmable thermostat, and all other equipment not specifically identified, to provide a properly functioning HVAC system. It is the desire of the City to replace with units of the same configuration to keep change to a minimum.

The City will provide all electrical labor and supplies required for installation. In addition, the City will wave all permit fees.

If it is necessary to take exceptions to the specifications as set forth, this must be so stated in the bid. Any reference to a model or brand name is only to denote quality and configuration, and does not mean that a product of equal quality will not be considered.

Specifications:

15-Ton R410A Duel Stage Split System

Carrier model 38AUDA16AK0K5 condensing unit

Carrier model 40RUAA16A2A6 air handler

Electric w/electric heat configuration – 208/230/3 phase
