

Public notice

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER **FARMINGTON PWS Has Levels of Radionuclides Above Drinking Water Standards**

Este informe contiene información muy importante sobre su agua potable. Tradúzcalo o hable con alguien que lo entienda bien.

Our water system recently violated a drinking water standard. Although this is not an emergency, as our customers, you have a right to know what happened, what you should do, and what we are doing to correct this situation.

Analyte	Running Annual Average (RAA) for period ending June 30, 2025	RAA Unit of Measure (UOM)	MCL	MCL UOM
Combined Radium (-226 & -228)	5.83	PCI/L	5	PCI/L

We routinely monitor for the presence of drinking water contaminants. Testing results based on a running annual average (RAA) of quarterly samples show that our system exceeds the standard or maximum contaminant level (MCL). (See table above.)

What should I do?

- **You do not need to use an alternative (e.g., bottled) water supply.** However, if you have specific health concerns, consult your doctor.

What does this mean?

- This is not an immediate risk. If it had been, you would have been notified immediately.
- Some people who drink water containing radionuclides in excess of the MCL over many years may have an increased risk of getting cancer.

What happened? What is being done? (Describe corrective action.)

Well 7 has typically met the standard without treatment. However, well 7 recently did not meet the standard. We are temporarily taking well 7 out of service while we evaluate the situation and work with MoDNR to get back in compliance. The other 13 wells in our system are in compliance with the standard.

For more information, please contact the Public Works Director, Larry Lacy at 573-218-8266 or 110 W Columbia, Farmington, MO 63640

Additionally, you may contact the Missouri Department of Natural Resources - Southeast Regional Office at 573-840-9750 or Public Drinking Water Branch at 573-526-6925.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
