

## **PUBLIC INFORMATION NOTICE**

In order to stay current with Building Code Design Standards, the City of Shenandoah has adopted the 2015 International Codes developed and published by the International Code Council.

We understand that changes can sometimes be difficult. Therefore, we have decided to provide accommodation by allowing for a transition period.

From October 1, 2017 through January 1, 2018 plans and projects can be designed to meet the criteria of either the 2012 or 2015 International Codes.

**As of January 1, 2018 all new building plans and projects must be designed to meet the criteria of the 2015 International Codes.**

By remaining current with modern Building Codes it establishes that construction within the City of Shenandoah will be of the highest quality for our residents, visitors, and business owners.

Thank you,

Danny Svoboda
