# Village of Skokie

## Alley Light Program Application

Dear Skokie Resident or Business Owner,

The Village of Skokie provides a comprehensive and effective street lighting program for all Village-owned residential, arterial, and collector streets within the Village boundaries. Often, though, residents and business owners are interested in additional lighting in the alley areas behind their property.

To provide an option for alley lighting, the Village manages a cooperative Alley Lighting Program through which lights can be placed in alleys at a low cost to the property owner.

For an annual charge of \$95 paid directly to the Village, the Village of Skokie will arrange to install, maintain, and provide electricity for a street lamp in the alley behind a resident's home or business establishment. For convenience, this fee will be added to the applicant's water bill annually. Groups of property owners can get together to request a light and the Village is able to divide the cost on the water bills of all property owners involved.

Once the Village is contacted requesting the placement of an alley light, Commonwealth Edison will survey the site to determine if a light can be placed on the existing power pole. All lights must be placed on existing poles or structures. Once your application is received by the Village of Skokie, an email/phone call will be sent to the resident or business owner who completed the form. The Village of Skokie will then send this information to ComEd and the Engineering Department will update the applicant once ComEd has scheduled the light to be installed.<sup>1</sup>

If the annual fee for the light is not paid in the future, the light may be turned off and eventually removed. If there are any questions, please call the Engineering Department at 847-933-8231.

To request the placement of an alley light near your residence or business establishment, please fill out this application and mail to the Engineering Department at 5127 Oakton Street, Skokie, IL 60077.
