capacity fee based on wastewater design flow rate determined from the table of minimum allowable design daily flow in 15A NCAC, 02T.0114 of the Environmental Management regulations contained in the North Carolina Administrative Code. See Attachment “A” for a copy of the table.

For the tributary sewer systems of Junaluska Sanitary District, Town of Clyde or Maggie Valley, wastewater flow allocation letters will be charged the sewer capacity fee at the outside rate. Lake Junaluska Assembly will be charged the sewer capacity fee for flow allocation letters at the inside rate (in consideration of their participation between 1942 and 1990 in the costs of sewer trunk and treatment plant facilities).

The minimum flow rate is 240 GPD. Sewer impact fees:

Inside	\$2.50/GPD
Outside	\$5.00/GPD

### 15A NCAC 02T.0114 WASTEWATER DESIGN FLOW RATES

(a) This Rule shall be used to determine wastewater flow rates for all systems covered by this Subchapter unless alternate criteria are provided by a program specific rule and for flow used for the purposes of 15A NCAC 02H.0105. These are minimum design daily flow rates for normal use and occupancy situations. Higher flow rates may be required where usage and occupancy are atypical, including, those in Paragraph (e) of this Rule. Wastewater flow calculations must take hours of operation and anticipated maximum occupancies/usage into account when calculating peak flows for design.

(b) In determining the volume of sewage from dwelling units, the flow rate shall be 120 gallons per day per bedroom. The minimum volume of sewage from each dwelling unit shall be 240 gallons per day and each additional bedroom above two bedrooms shall increase the volume by 120 gallons per day. Each bedroom or any other room or addition that can reasonably be expected to function as a bedroom shall be considered a bedroom for design purposes. When the occupancy of a dwelling unit exceeds two persons per bedroom, the volume of sewage shall be determined by the maximum occupancy at a rate of 60 gallons per person per day.

(c) The following table shall be used to determine the minimum allowable design daily flow of wastewater facilities. Design flow rates for establishments not identified below shall be determined using available flow data, water-using fixtures, occupancy or operation patterns, and other measured data.

**Renewable Energy and Energy Efficiency Portfolio Standards (REPS):**

In 2007, the North Carolina General Assembly passed legislation that requires utility companies to develop an increasing supply of alternative energy resources, with 3% of their total supply coming from renewable by 2013 and 12% from renewable by 2021. Utility companies are charging their customers to recover the cost of the renewable energy they purchase. In turn the Town is passing along these costs to its customers. These charges (REPS) are set each December by our power supplier. The current REPS charge per month are as follows:

Residential	\$ 0.53
Commercial	\$ 2.67
Industrial	\$ 26.80

Deposits (Applicable to tenant occupied accounts only)

Residential -	Electric (with electric heat)	\$170.00	Electric (without electric heat)	\$120.00
Commercial -	Electric	\$200.00		

Deposits may be refunded at customer request if the most recent twelve months of billings have been paid before a late-payment penalty has been added. Deposits available at termination of service are applied to unpaid utility balances and any excess deposit is refunded to customer.

Deposits may be transferred to a new account when customer is moving if the current account is paid in full. The final bill at the current location will be transferred to the new location if not paid in full within thirty (30) days of billing.
